Subject: RE: GCP

Dear [redacted]:

FDA does not itself conduct GCP training --- although we do collaborate with the Department of Health and Human Service's Office for Human Research Protection (OHRP) and the Department of Veterans Affairs (VA) on regional programs focused on human subject protection in regulated research. These are listed on our GCP website (www.fda.gov/oc/gcp) through the link to Educational Materials/Workshops. I believe there is a program scheduled in the [redacted].

Otherwise (and for training more specifically in GCP), you will need to consult with other organizations which conduct such training. FDA can not endorse any specific program; however, we are acquainted with the Association for Clinical Research Professionals (www.acrpnet.org) and the Drug Information Association (www.diahome.org) among others.

I hope this information is useful.

Sincerely,

David A. Lepay, MD PhD
Senior Advisor for Clinical Science and
Director, Good Clinical Practice Programs,
OSHC, Office of the Commissioner, US FDA
