1.2.C.-(DoD303) This question should be answered by all owned installations, except the Pentagon Reservation (see amplification for definitions). For EACH building of owned, administrative space that is located on your installation, excluding the Pentagon Reservation, complete the following table by occupant per building. Include each occupant's name/UIC or department equivalent and which building(s) they occupy (building number, name, address), as well as the GSF (Gross Square Feet) and personnel breakdown (authorized and on-board/detailees) per occupant per building. Provide the projected number of ADDITIONAL personnel and space needed to meet any surge requirements. NOTE - there can and should be multiple entries for the SAME building IF it contains more than one occupant. Space/buildings occupied by DoD Defense Agencies should NOT be included, but all other DoD space should be reported. In the final column answer this yes/no questions: If additional personnel ARE required under operational and/or contingency plans to perform administrative functions, do you have sufficient administrative space to accommodate the surge?

5.1.2.C.-(DoD503) Calculate the maximum capacity (in DLHs) for each depot level commodity group at each installation. Use the standard factors as outlined in Chapter 2, DoD Depot Maintenance Capacity and Utilization Measurement Handbook, DoDD 4151.18H. Limit changes to those approved in the Fiscal Year 2004 and prior National Defense Appropriations Acts. The definition for Maximum Capacity is defined as the workload that could be accomplished within the following constraints; No additional Military Construction (MILCON) to that already funded through the FY 04 National Defense Appropriations Act; Capacity is measured on 40-hour workweek baseline; Skilled workforce is available/can be obtained; Support equipment/workstations come with transferred workload; Existing work continues to be performed; Underutilized facilities/space can only be calculated once for an optimal work mix. Provide your answers expressed in direct labor hours (DLH) by commodity groups for each Fiscal Year requested. NOTE: See DoD Depot Maintenance Capacity and Utilization Measurement Handbook, DoDD 4151.18H, dtd Jan 24, 1997 and Handbook Supplemental guidance, dtd Oct 4, 2001. 7.7.I.-(DoD676) Were there any infrastructure constraints that limited the Supply and Storage Activity's capability to process greater quantities of receipts each day? If yes, describe the constraints and their impacts.
(Text)
HQBN--Vehicle not readily available. / FSDB--Wholesale Supply Operations: Mechanization of Warehousing and Shipping Procedures (MOWASP) functionality; LOGMARS and shortage of secure warehouse material handler. MOWASP is utilized by Fleet Support Divisions (FSDs) Albany and Barstow to process warehousing and storage actions of principal end items and small arms at the Marine Corps wholesale supply level. Additionally, separate Marine Corps systems are utilized to track weapons and principal end items by serial number and projects/components for sets, kits, and chests. MOWASP is antiquated and requires extensive Marine Corps financial resources to maintain and/or modify. Processing is both online and cyclic daily batch with may flat files that requires NATURAL, and Class II programs to retrieve data. MOWASP is not interfaced with Automated Set Assembly, Weapons Serial File, or the Serial Tracking System; therefore, requires multiple inputs by users to each of the systems because MOWASP does not have the required functionality. FSDs do not have LOGMARS for principle and items that provide barcode technology capability. MOWASP also does not support LOGMARS application. Retail Supply Operations: MUMMS SS07 (DSSC) is not an integrated system that allow for data extration and report capabilities. The legacy system considerably reduces responsiveness to customer needs because of real time replenishment visibility. Current system requires excessive and intense manual input to meet customer demands. Third Party Logistics sales by SKU are also not compatible with MUMMS SS07. An alternative would be the implementation of a Real Time Inventory (RTI) System, which does support SKU/UPC processing.
