1.2.C.-(DoD303) This question should be answered by all owned installations, except the Pentagon Reservation (see amplification for definitions). For EACH building of owned, administrative space that is located on your installation, excluding the Pentagon Reservation, complete the following table by occupant per building. Include each occupant's name/UIC or department equivalent and which building(s) they occupy (building number, name, address), as well as the GSF (Gross Square Feet) and personnel breakdown (authorized and on-board/detailees) per occupant per building. Provide the projected number of ADDITIONAL personnel and space needed to meet any surge requirements. NOTE - there can and should be multiple entries for the SAME building IF it contains more than one occupant. Space/buildings occupied by DoD Defense Agencies should NOT be included, but all other DoD space should be reported. In the final column answer this yes/no questions: If additional personnel ARE required under operational and/or contingency plans to perform administrative functions, do you have sufficient administrative space to accommodate the surge?

Include all 171X, 179X DoD Facility Analysis Code (FAC) series, and any other applicable FACs. Design Capacity is the number of students for which a classroom, etc., is designed. Total Capacity is student hours per year. For example: In the category 1711, a type of training facility is Flight Training Classroom. If you have 10 classrooms with a capacity of 25 students per room, the design capacity would be 250. If these classrooms are available 8 hours a day for 244 days a year, the capacity in student hours per year would be 488,000.

Section : Ramp Space / Taxiways

1.6.3.A.-(DoD8) Complete the following tables for ramp/apron space. Include only the ramps/aprons which are owned/controlled by the installation opr which the installation has access to but may not own. "Controlled" includes land/property used by DoD under lease, license, permit, etc. "Access" includes land/property for which an agreement/easement is in effect between the DoD and the owner (such as ANG/AFRC use of civilian airports), but primary control rests with the owner, not DoD. Identify all non-contiguous ramps. These are ramps which are pavement areas larger than 2,750 square yards, connected to other airfield pavement areas by a taxiway. For example, a large ramp area which has a hangar or row of hangars constructed on it would then be considered two ramp areas. Number all ramp areas in sequential fashion if no alpha-numeric scheme adopted by the installation.

For each reported item, select a type from the list provided in the 'Description' field, and identify in the appropriate field: (a) the location of the item (including activity name, installation, and building number, or for leased space, list city and street address); (b) significant characteristics that define the capabilities of the facility or piece of equipment [e.g., operating characteristics, accreditations (type and year of accreditation), etc.]; (c) its square footage; (d) the number of workdays the item was used in FY03; (e) the total available workdays for the item in FY03; and (f) the capability domain(s) for which the item was used at any time from FY01 through FY03 [see capability domain definitions in Amplification section; enter "Yes" for all that apply]. In determining the number of workdays used in FY03, do not include any usage of the facility or equipment for purposes other than its intended R&D function. Total available workdays for FY03 should be the number of actual workdays in FY03 less any days the facility/equipment item was unavailable for R&D due to requirements for routine maintenance, scheduled upgrades, inspections or other similar reasons. Report, at a minimum, the following items, if such facilities/equipment are present at your activity, and under 'Characteristics', include the characteristics identified in parentheses after each: - Biosafety Level 2 Labs (list each suite as a separate item; identify whether there is an approved biosurety plan for the facility) - Biosafety Level 3 Labs (list each suite as a separate item; identify whether there is an approved biosurety plan for the facility) - Biosafety Level 4 Labs (list each suite as a separate item; identify whether there is an approved biosurety plan for the facility; identify whether the suite has aerosol capability) - Dilute Chemical Surety Material Labs - Chemical Surety Material Labs - Hypobaric Chambers (list each chamber as a separate item; identify whether they are man-rated) - Hyperbaric Chambers (list each chamber as a separate item; identify whether they are man-rated) - Anechoic Chambers (list each chamber as a separate item) - Climatic Chambers (list each chamber as a separate item; identify temperature and humidity ranges, wind or rain generation capability, etc.) - AAALAC Accredited Animal Facilities (identify the total average census by species for FY 03 and the maximum census by species when the facility is at 100% overall usage) - Man-rated Research Simulator Facilities (this category includes fixed- and rotary-wing aircraft, multi-axis ride platforms, G-force simulators, etc.; list each type as a separate item and specify the type in the 'Characteristics' field) - cGMP Biological Production Plant (list each suite as a separate item) - cGMP Pharmaceutical Production Plant (list each suite as a separate item) - Genomic Chip Fabrication Facility (list each facility separately) - Electron Microscope Facility (identify the different types of microscopes that are present and the number of each) - Medical Imaging Device Facilities (list only those facilities used for research; identify the specific types of devices that are present, e.g., CT, NMR, Ultrasound, X-ray, etc., and the number of each type) - Clinical Studies Areas (identify the number of beds included in the facility) In addition to those items listed above, report any other major facilities/equipment, limited to those items that are (a) integral to the building in which they are located (e.g., require special engineering, such as reinforced floors, electromagnetic shielding, special ventilation, etc.) and (b) would cost at least $250 K to relocate. Use the "Other" designation in the 'Description' field for any items of this type, and provide a further identification of each item in the 'Characteristics' field.
