February 11th, 2009

There is a significant disparity between the Election laws of each state. In several states, the laws prohibit citizens from getting federal candidates of their choice on the state ballots in a timely way. Even more than that, in some states, the laws may be unconstitutional.

I suggest the FEC examine each state's laws and practices to ensure parity and fairness across all states, while guaranteeing that our constitutional rights as citizens, to put our chosen federal candidates on the ballot, are not being suppressed.

Respectfully submitted,
Bob Zabik
