Mr. Kingsbury:

As stated in my telephone message to you earlier this morning, I have forwarded the above attachments that may assist you with your FOIA request for all records that pertain to the Starfish Prime nuclear test for July 9,
1962.

You also stated in your request that you are seeking evaluations of the test, its impact on US and foreign satellites, damage to power grids, radio transmissions and the like from US and foreign nations, and data that determined the impact the test had on the Van Allen radiation belts.

I will also forward other attachments from the Department's website that may assist you with your request. Please let me know if these attachments and the one's forthcoming will satisfy your request.

Carolyn,

Starfish Prime was part of the Fish Bowl Series during Operation Dominic-I in the Pacific in 1962. The reports I believe the requestor would be interested in would be on the "Fishbowl Operation" printout. All of these citations are on OpenNet. You may have the requestor contact us for documents he wants from OpenNet or the printouts attached, if you would like.
