Preface

The Rocky Mountain Regional Care Model for Bioterrorist Events (RMBT) Final Report to the Agency for Healthcare Research and Quality (AHRQ) is based on extensive regional collaboration and research over a twelve-month period from October 2002 through October 2003. The process used to develop and begin validation of these regional surge capacity ideas involved a series of regional Working Group and Steering Committee sessions, supplemented by a review of other surge capacity models and literature on bioterrorism and disaster preparedness.

The Rocky Mountain Regional Care Model for Bioterrorist Events is a product of a multi-agency Working Group, including representatives from the staffs of major academic medical centers, government, military, public health, and emergency management institutions and agencies at the federal, state and local level. We wish to thank all member organizations of the RMBT Working Group for their dedication and contributions.

The use of either trade or manufacturers' names in this report does not constitute an official endorsement of any commercial products. This report should not be cited for purposes of advertisement.

The authors of this report are responsible for its content. Statements in the report should not be construed as endorsement by the Agency for Healthcare Research and Quality or the U.S. Department of Health and Human Services of a particular drug, device, test, treatment, or other clinical service.

Acknowledgments

We wish to thank all member organizations of the RMBT Working Group for their dedication and contributions.

We thank Lloyd Baker, Bioterrorism Preparedness Program Manager at the Utah Department of Health; Todd Damrow, State Epidemiologist, and Lorrie Leighton-Boster, Public Health Disaster Coordinator at the Montana Department of Public Health and Human Services; Robin Koons, Ph.D., Director of the Hospital Preparedness Program at the Colorado Department of Public Health and Environment; James McKinna of the Wyoming Department of Health; Brenda Vossler, Hospital Coordinator at the North Dakota Department of Health; LaJean Volmer, Hospital Bioterrorism Preparedness Coordinator at the South Dakota Department of Public Health; and COL Debra Tenney and Zane Shaw, Program Managers for NDMS Front Range and Utah, respectively, for their assistance in developing the profile of regional medical resource capacity.

We also thank LTG (Ret.) P.K. Carlton, Jr., Director of the Integrative Center for Homeland Security at Texas A&M University; John Hoyle, Director of the Noble Training Center; COL Donald D. Coates, Chief of the Medical Operations Division at Peterson Air Force Base; Curtis R. Hawkinson, Chief Executive Officer at Keefe Memorial Hospital; Gregory M. Bogdan, Ph.D., Research Director of the Rocky Mountain Poison and Drug Center and Coordinator of the Denver Metropolitan Medical Response System; and Michael Nugent, Exercise and Training Officer at Denver Office of Emergency Management for sharing their expertise by leading working group discussions. The authors are indebted to John Thompson and Edward Maxey of the Department of Engineering at Denver Health for their dedication and skill in reviewing and completing the Alternative Care Site Selection Matrix. We would also like to thank Paula J. Dickson, M.A., of the Health Services Research Department at Denver Health for her expertise in completing the data collection and analysis.

We thank BG Lloyd E. Dodd, Jr., Command Surgeon, COL Robert M. Gum, Deputy Command Surgeon (Ret.), and COL Anthony M. Rizzo, Director of Operations at the Surgeon's Office of U.S. Northern Command; and LTC Stephen A. Knych, Chief of Disaster and Trauma Systems at the Air Force Directorate for Homeland Security; Scott P. Lee, Regional Emergency Coordinator at the US Public Health Service Region VIII; and COL (Ret.) Rasa Silenas, Deputy Director of the Development Center for Operational Medicine for their valuable advice and guidance throughout this project.

Contents

Executive Summary ix

Chapter 1. Introduction 1
Purpose 1
Background 2
Defining a Region for Medical Response to Bioterrorism 4

Chapter 2. Methodology 7

Chapter 3. Profile of Regional Medical Resource Capacity 9
3.1 Medical Care Facilities 9
3.2 Medical Staffing Resources 13
3.3 HRSA Hospital Preparedness Survey Summary 19

Chapter 4. Additional Resources to Meet Surge Needs 29
4.1 Selecting an Alternative Care Site 29
4.2 Supplying and Staffing an Alternative Care Site 33
4.2.1 Supply Options 33
4.2.2 Staffing Considerations 35

Chapter 5. Measures of Preparedness 37
Hospital Beds 38
Medical Staffing 42
Equipment 53
Infrastructure 54

Chapter 6. Isolation/Quarantine 57
6.1 Definitions 57
6.2 Identified Issues 57
6.3 Conclusion 60

Chapter 7. Other Surge Capacity Issues 61
7.1 Risk and Crisis Communication 61
7.2 Preparedness Considerations: Special Populations that are Vulnerable 64
7.3 The Relationship Between Bioterrorism and an All Hazards Approach 69

Chapter 8. Example Of A Regional Exercise 75
Objectives 75
Exercise Scenario 76
8.3 Main Issues and Potential Issues 76

Chapter 9. Conclusion.....79
9.1 Limitations.....79
9.2 Recommendations.....80
