> We've heard President Obama on the TV alot talking about how he's
> promoting wind and solar power in the new stimulus bill. But in the
> Senate version of the bill, it's all a great, big, honking FRAUD,
> because the 50 billion in loan guarantees for "eligible technologies"
> there has been deceptively defined so that most of that money will
> instead go to finance nuclear and filthy coal power plants instead.
>
> We know this because Republican Senator Bennett from Utah made sure
> that was the intent when he snuck this provision into the bill in the
> Appropriations Committee. Why it is still there after Bennett himself
> voted against the whole package is an outrage. But because the House
> bill lacks this garbage provision, we still have a chance to remove
> it in the reconciliation between the Senate and house versions.
>
> And if that weren't bad enough, there is another billion for new
> nuclear weapons development. That's not the kind of infrastructure we
> were promised.
>
> Because of the urgency of this action, please call your members of
> Congress toll-free at 800-828-0498 or 800-459-1887 to raise an
> immediate fuss about this. Then submit the action page below as well
> as a follow up.

> What a cruel and dishonest trick on the American people if this is
> all allowed to pass, to foist the sludge spill disasters of the
> future on us, in the sheep's clothing of a green energy spirit, which
> is what we thought we were all voting for in the last election.
>
> All they've talked about for years is how vulnerable nuclear power

> plants would be to a possible terrorist attack, and now they want to
> build many more?? And this is on top to the fact we have nowhere to
> put all the dangerous nuclear waste existing plants have already
> generated. This is not the change we were promised and it's time to
> make that abundantly clear with our phone calls and emails. Please
> make your toll-free calls and submit the action page above.

> If They Can Prosecute Michael Phelps They Can Sure Prosecute Bush and
> Cheney
>
> In light of the growing movement for county by county prosecutions of
> the former murderous occupants of the White House, did you catch the
> story that Richland County, SC is hell bent on prosecuting swimmer
> Michael Phelps for getting photographed with a bong, and has already
> arrested 8 people. If they can threaten an Olympic champion with hard
> time for being in the same room with a water pipe, they can damn well
> bring charges against Bush and Cheney for the senseless murder of
> citizens in their own county.
>
> On the same return page from the stop nukes & coal action page above,
> you can also find the new local county prosecutor lookup, which we
> are using to call, write and email local district attorneys, asking
> them to bring murder charges against George Bush and Dick Cheney as
> urged by Vince Bugliosi. If any resident of your county was killed a
> war based on false pretenses, Bugliosi says that district attorney
> has grounds to bring murder charges. At the top of all these pages,
> there is a link to a terrific YouTube video you can watch on this of
> Bugliosi's House testimony.
>
> There you will also find the request form for the new "Convict Dick &
> W" caps, the ones with a little embroidered cowboy hat hung on the
> "W", intended to ridicule the original cowboy from Connecticut
> himself, who always looked about as at home on that fake Crawford
> ranch as Eva Gabor looked on Green Acres. So if you have not
> requested yours yet, you can get one from the return page after you
> submit the statute of limitations extension action page.

> The local prosecutor initiative is an important long term back up
