Dear Superintendent MacDonald,

Sand lance are the foundation for the food web in Stellwagen Bank National Marine Sanctuary. Whales, codfish and sea birds come to Stellwagen to feed on sand lance, a critical part of their diet. Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.

Thank you,

Oct 3, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Velia Banbor

Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.
Some would argue that we need to become less Human species centric. I would say that protecting the other species in the world is being more Human species centric. We need to have the other species on the planet and to that end we have to stop some of our practices that are wiping them out. Seriously interfering with their basic food chain is one of

the ways we have killed of many species already. Lets give the whales a break!

Dear Superintendent MacDonald,

Sand lance are the foundation for the food web in Stellwagen Bank National Marine Sanctuary. Whales, codfish and sea birds come to Stellwagen to feed on sand lance, a critical part of their diet. Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.

Thank you,

Dear Superintendent MacDonald,

Sand lance are the foundation for the food web in Stellwagen Bank National Marine Sanctuary. Whales, codfish and sea birds come to Stellwagen to feed on sand lance, a critical part of their diet. Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.
This should have been addressed in the Stellwagen Draft Management

Plan. Its unfortunate to have to request these piece meal actions when your agency is mandated to
protect the marine resouces of this nationally designated area and the public trust. Please uphold your responsibilities as a resource management agency or at least program and take the necessary and required action.

Thank you,

Mr. Gib Chase

Sep 30, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Cid Martins

Dear Superintendent MacDonald,

Sand lance are the foundation for the food web in Stellwagen Bank National Marine Sanctuary. Whales, codfish and sea birds come to Stellwagen to feed on sand lance, a critical part of their diet. Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.

Thank you,

Dear Superintendent MacDonald,

Sand lance is a small fish with a big role in this ecosystem. Vast schools of sand lance appear on Stellwagen Bank every year to breed in

this rare sand environment. They are the foundation for the food web, a critical source of calories for the whales, codfish, and seabirds that come to Stellwagen to feed. It is crucial that we give these animals what they need to thrive.

Please initiate regulations to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank. Now is the time to put controls in place to discourage a fishery before the investment is made.
Thank you for your consideration and for accepting these comments.

Scituate, MA 02066

Dear Superintendent MacDonald,

Sand lance are the foundation for the food web in Stellwagen Bank National Marine Sanctuary. Whales, codfish and sea birds come to Stellwagen to feed on sand lance, a critical part of their diet. Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.

Thank you,

Ms. Rosanne Bakkerwind

Scituate, MA 02066

Dear Superintendent MacDonald,

Sand lance are the foundation for the food web in Stellwagen Bank National Marine Sanctuary. Whales, codfish and sea birds come to Stellwagen to feed on sand lance, a critical part of their diet. Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.

Thank you,

Ms. Michele DiGiorgi

Scituate, MA 02066

Dear Superintendent MacDonald,

Through your expertise and earned professionalism you undoubtedly know all about the sand lance. You already appreciate how crucial they are to the life cycles in the Stellwagen Bank National Marine Sanctuary.
I am reminding you of their place in the foundation of the food chain because the Ocean Conservancy asked me to. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.
If the Ocean Conservancy is aware of how necessary this regulation is, then I am sure you will follow through. Ocean Conservancy members are sensitive to how oceans are imperiled, just as soils, fresh water, and clean air are.The need for enlightened action is now in every sector of man's dominion. Your work for the best interests of the Stellwagen is part of an urgent need to heal the serious problems industrialism rather unwittingly created.

Dear Superintendent MacDonald,

I am a seabird ecologist. I have been involved in marine research for well over 10 years.
The Sand Lance is a small forage fish which plays a vital and central role in the marine food web of the north Atlantic Ocean. Seabirds, whales, and commercial fish species, such as cod, all visit the Stellwagen Bank National Marine Sanctuary to feed on Sand Lance, a critical part of their diet.

Please initiate regulations now to prevent an industrial scale fishery for Sand Lance from ever happening on the Stellwagen Bank, and protect the marine ecosystem that relies so heavily on this pivotal species.

Scituate, MA 02066

Dear Superintendent MacDonald,

Sand lance are the foundation for the food web in Stellwagen Bank National Marine Sanctuary. Whales, codfish and sea birds come to Stellwagen to feed on sand lance, a critical part of their diet. Give these animals what they need to thrive. Please initiate regulations now to prevent an industrial scale fishery for sand lance from ever happening on Stellwagen Bank.

Thank you,

Mr. Seth McElhinney

Date: 09/28/2008 10:52:08 PM

Sep 28, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Nicole Luskey

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Lorene Milligan
4804 Laurel Canyon Blvd
Valley Village, CA 91607-3717

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Philip Heinlein

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

As a retired federally licensed Giant Atlantic Bluefin Tuna fisherman,
I am writing in regard to the Draft Management Plan for the Stellwagen

Bank National Marine Sanctuary. Speaking from personal experience, I am
very concerned that New England's only Sanctuary provides very little
protection for the habitat and animals within its borders, and that
your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels
and loss of their food sources, and that human activity, particularly
fishing, is compromising the purpose of the Sanctuary. Time is of the
essence. The proposed action plans should include detailed regulatory
proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the
final plan:
-Develop regulations immediately to reduce whale disturbance by all
commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that
designate no-take research reserves and limited-use areas in addition
to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand
lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's
guiding vision.
Thank you for your consideration.

Sincerely,

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Karina Aguilo

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Julie Stuckey

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Scituate, MA 02066

Dear Superintendent MacDonald,

To whom it may concern:

I am very concerned about the condition of Stellwagon Bank and also the whales inhabiting the area in the transitional and warmer months. As a diver, I have noticed fewer and fewer fishes in these waters. i have friend who have seen first hand the effects of draggers on the stellwagon sea floor, distrupting all bottom habitat, where evrything hides and lays aeggs and grows from. Last year a whale I photographed in September off Provincetown was later entangled in fishing lines off

lower RI on their anual trip south. I was diving nearby and people were watching a rescue effort from shore. I know we recently lost a fisherman who was developing nets that allow "trash" life to

more easily escape, and for dragging to be less destructive. More needs

to be encouraged like these ideas. Shipping lanes should be redirected

where posible, to avoid our whales. Shark finning should no be condoned as it is barbaric and cruel, desides depleting our top predator and scavengers of our oceans. As our eating habits change and fish is encouraged by doctors, no longer for Fridays only, we are requiring more and more from our oceans. It will be a difficult challenge to balance and meet.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition

to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

We are very concerned that New England's ONLY Sanctuary is just that in

name. It actually little protection for the habitat and animals within
its borders. The newly proposed plan does nothing to establish let
alone increase protection.

Your agency allows whales to be impacted by vessels, their food sources
reduced, and allows commercial fishing to compromise the
"Sanctuary".
In the name of your agency and for its integrity, You need to make an
action plan to include detailed regulatory proposals for immediate
development and implementation. Among logical plan improvements:

-Regulations to immediately reduce whale disturbance by all commercial
and recreational vessels;
-A zoning plan to immediately designate no-take research reserves and
limited-use areas in addition to areas for commercial and recreational
use;
-Ban fishing on forage species such as sand lance and herring;
As citizens who pay your salary and who have served our country and
expect you to do the same, please protect our country. This preserve
is the part of our country we have entrusted to you. Please do your
job.
Thank you.

Sincerely,

Ms. John and Janet Fiore

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Carole Mouton

-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

Although it may be difficult to regulate vessel traffic and fishing at this time, many stand to gain if we can be more gentle with this

delicate ecosystem. If we give the whales, fish, and other sea life an

actual sanctuary, their numbers will stabilize or increase. Protecting this ocean sanctuary will provide benefits for everyone, including the seafood and tourist industries. We just have to, for the time being, invest in sea and not profit from it.
Thank you.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Vale Sibley

Sep 2, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Joshua Wallman

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Joyce Stowe-Longchamp

Dear Superintendent MacDonald,

With regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary, I am extremely concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders. Furthermore, your proposed plan does not increase protection.
The plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. However, any proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial
and recreational use;
-Develop regulations to ban fishing on
forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding
vision.
Thank you.

Sincerely,

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. felicia peters

Scituate, MA 02066

Dear Superintendent MacDonald,

The Stellwagen Bank National Marine Sanctuary is one of New England's greatest treasures!
You have been up and down in terms of protecting it. The sanctuary is under threat from so many angles! The sanctuary needs your help! MORE protection! MORE friends in high places.

PLEASE think of what is best for the sanctuary! More boats equals more collisions with whales. And the creatures who inhabit the sanctuary cannot protect themselves. They have no voices. They are helpless.
YOU can help save the sanctuary! YOU can help ensure it's healthy future! Isn't the sanctuary more important than more boats, more marinas, more development?!
The sanctuary needs a hero!
Will you be it's hero?
Will you stand up to big business and developers?
Will you think of it's protection?
Will you be it's protector?

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Elizabeth Castigliego

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Andra Heide

-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
I believe that Canada has already adopted plans to limit boat collisions with whales. Why can't New England do the same thing:
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Aug 29, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am a seabird ecologist and have been involved in marine studies and ecological research for two decades.
I have recently reviewed the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am extremely concerned that New England's only Marine Sanctuary provides practically no protection for the habitat and animals within its borders.
The document contains clear and compelling indications that the Sanctuary's biodiversity is at risk, that endangered whales are impacted by vessels and loss of food resources, and that human

activity, particularly fishing, is compromising the very purpose of the Sanctuary. Yet, your proposed plan does absolutely nothing to increase protection.

The proposed action plans should include detailed regulatory proposals for immediate development and implementation, and I urge you to revise the draft plan to include the following actions:
1) Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision;
2) Develop regulations to ban fishing on forage species such as sand lance and herring;
3) Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;

4) Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use.
Please don't miss this opportunity to provide meaningful and lasting

protection for the marine resources that the people of New England have been so dependent on, and so proud of, for centuries.

Sincerely,

Dr. Iain Stenhouse

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Archie Gress

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing to you specifically in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am extremely concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.

I grew up spending summers on the Cape and now I live on the east coast

of Florida. Ocean protections are essential to saving the places I love

and live in from being senselessly and selfishly destroyed by over use. Human's cannot seem to take responsibility to curb their own destructive behaviors, so laws must be put in place to guide thoughtless actions towards responsible and intelligent choices. Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen

Bank National Marine Sanctuary that provides very little protection for

the habitat and animals within its borders, and that your proposed plan
does not decreases protection.

Your plan admits that the Sanctuary is at risk, including that vessels

threaten whales with collision and propeller injury, loss of whale food
sources, and fishing is negatively affecting the Sanctuary overall.
Your proposed action plans must include detailed regulatory proposals
for immediate development and implementation.

I demand that you to revise the draft plan to contain the following in
the final plan:
-Develop regulations immediately to reduce whale disturbance by all
commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that
designate no-take research reserves and limited-use areas in addition
to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand
lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's
guiding vision.
Thank you.

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Nicolas BELLEUDY

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation - proposals which protect the endangered fish and whales and provide a true sanctuary for them.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Kalan Susan

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection. Why is it that 'conservators' of resources like

yourselves always have to be loudly reminded of your commitments? Is it really too hard for you to just do the right thing as you originally agreed? Please step up to this--your reputation is on the line here, along with these animals' well-being!
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Miss Alexandra Bowers

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Margaret Mainelli

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Mary Norburn

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. linda holing

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Paul Waldman

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am an active member of the American Cetacean Society and am familiar with the Sanctuary. I'm very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection of them.
It's clear that time is of the essence, as your plan contains compelling information demonstrating that the Sanctuary's biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, especially fishing, is compromising the Sanctuary's purpose. The proposed action plans needs to include detailed regulatory proposals for immediate development and implementation.

As a scientist, cetacean lover, and concerned U.S. citizen, I urge you to revise the draft plan such that the final plan contains the following:
- Immediate development of regulations to reduce whale disturbance by all commercial and recreational vessels;
- Immediate development of a zoning plan with accompanying regulations that designate no-take research reserves and limited-use areas, in addition to areas for commercial and recreational use;
- Development of regulations to ban fishing on forage species such as sand lance and herring;
-Official adoption of the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Frank Willims

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Silvia Martinotti

Dear Superintendent MacDonald,

I am writing to express my concerns about the Draft Management Plan for

the Stellwagen Bank National Marine Sanctuary. I am very concerned that
New England's only Sanctuary provides very little protection for the
habitat and animals within its borders, and that your proposed plan
does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels
and loss of their food sources, and that human activity, particularly
fishing, is compromising the purpose of the Sanctuary. Time is of the
essence. The proposed action plans should include detailed regulatory
proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the
final plan:
-Develop regulations immediately to reduce whale disturbance by all
commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that
designate no-take research reserves and limited-use areas in addition
to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand
lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's
guiding vision.
Thank you for your consideration and for accepting these comments.

Sincerely,

Scituate, MA 02066

Dear Superintendent MacDonald,

My name is Anah McMahon, and I'm a strong supporter of protecting our environment and its invaluable species.
I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Anah McMahon

175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Lee Cali

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
As an educator, I encourage my students to think about how we can protect our natural resources. Our oceans are precious, and we

continue to destroy them. We need to really look at how we're impacting the oceans and the species they provide homes to. Please consider the

above. We will all benefit from more careful stewardship of every part of our environment.
Thank you.

Sincerely,

Ms. Marilyn Mahoney

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Bobbie Newcomer
4315 Sunbeam Lake Dr
Jacksonville, FL 32257-8118

Aug 21, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am deeply concerned that while Stellwagen Bank National Marine Sanctuary is New England's only Marine Sanctuary, the current Draft

Management Plan provides very little protection for the habitat or the animals within its borders. Why is this?
Your present Draft Plan clearly contains compelling information which

demonstrates that the Sanctuary's biodiversity is at risk. It specifies that endangered whales are impacted by vessels, as well as the loss of their food sources. It also states that human activity, particularly fishing, is compromising the purpose of the Sanctuary.

Time is of the essence. I urge you to revise the Draft Plan to contain the following:

-Develop regulations to reduce whale disturbance by all commercial and recreational vessels immediately ;
-Develop a zoning plan with accompanying regulations that designates no-take research reserves,limited-use areas, and areas for limited commercial and recreational use;
-Develop regulations to ban fishing on forage species.
-Officially adopt the Stellwagen Bank National Marine Sanctuary's guiding vision as the guide for your Management Plan for preserving Stellwagen Bank.
Thank you.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Maureen Nichols

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Lynn West

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Cathy O'Donnell

Dear Superintendent MacDonald,

I am writing to you about the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am concerned that New England's only sanctuary provides very little protection for the habitat and animals within its borders, and that the proposed plan does not increase protection.
Your plan provides compelling information that the sanctuary's

biodiversity is at risk, that endangered whales are affected by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the sanctuary. The proposed

action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain these points in the final plan:
-develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-develop a zoning plan immediately, with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-develop regulations to ban fishing on forage species such as sand lance and herring;
-officially adopt the proposed draft "Vision" as the sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Patti Borthwick

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Michael Ott

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Donald Shaw

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Miss rory schneider

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Alice H. Brody

Aug 21, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing with great concern in regards to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for

the habitat and animals within its borders, and that your proposed plan does not increase this protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation and enforcement.

Please consider revising the draft plan to contain the following in the final plan:
-Immediately develop regulations to reduce whale disturbance by all commercial and recreational vessels before it is too late;
-Immediately develop a zoning plan with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop, Implement and Enforce regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. B Stone

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. The Ocean is in trouble!
The Sanctuary's biodiversity is at risk because of human activity, particularly fishing and is compromising the purpose of the Sanctuary.
.
Revise the draft plan NOW!
-Reduce whale disturbance;
-Develop a zoning plan;
-Ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. lesley stansfield

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Molly Walsh

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

I'm writing as one who has immensely enjoyed whale-watching excursions on the Dolphin Fleet, which is very environmentally conscious, but the

idea that such activities endanger the animals will make me think twice about going on a whale watch again. If regulations were in place, I'd go with an easy heart.
Thank you.

Sincerely,

Dr. Anca Vlasopolos

How do I know if I send money to help that any help will really occur? If the managers are not doing anything now, what is going to make them do anything now except spend the money on themselves? This is why people are afraid to help because people are dishonest and really do not care about the animals.
Thank you.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Keith Hanson

Scituate, MA 02066

Dear Superintendent MacDonald,

I am very concerned about the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. Despite being New England's only Sanctuary, Stellwagen provides very little protection for the habitat and animals within its borders, and the fact that your proposed plan does not increase protection is quite lamentable.
Despite the fact that your plan contains compelling information that the Sanctuary's biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary, the proposed action plans include far fewer detailed regulatory proposals for immediate development and implementation than are necessary for even adequate protection.
t is my request that you to revise the draft plan to contain the following in the final version:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Can we please give the whales a break and a safe place to go!
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Janet Molchan

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Ben Starr

Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Adriana Faraldo

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.

Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Russell Collins

Aug 21, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I'm writing about the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I'm very concerned that New England's only marine sanctuary actually provides very little protection for the habitat or marine life in the sanctuary; and your proposed plan does not increase that protection.
The plan itself states the adverse consequences of this failure to protect the sanctuary - biodiversity is at risk, endangered whales are impacted by ships and loss of food sources, and human activity (especially fishing) is compromising the Sanctuary. We can not afford to waste any more time - the proposed action plans need to include detailed regulatory proposals for immediate implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Immediately develop regulations to reduce whale disturbances by all commercial and recreational vessels.
-Immediately develop a zoning plan with accompanying regulations that designates no-take research reserves and limited-use areas in addition to areas for commercial and recreational use.
-Include regulations to ban fishing on forage species such as sand lance and herring.
Thank you.

Sincerely,

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Miss Melissa Farthing

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
We can't afford the loss of our precious ocean life in needless ways anymore.
Thank you.

Sincerely,

Mrs. Stacy Jenkins

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Susan Westervelt
PO Box 223
