Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

We need to save all of our oceans and sanctuarys are the best way to do this.
Thank you.

Sincerely,

Mrs. Elaine Dunbar

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am DEEPLY concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan still does NOT increase protection!
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence! The proposed action plans MUST include detailed regulatory proposals for immediate development and implementation!
I STRONGLY urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations IMMEDIATELY to reduce whale disturbance by ALL commercial and recreational vessels;
-Develop a zoning plan IMMEDIATELY with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to BAN fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing over concerns with the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. The problemis that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.

There is convincing evidence that that the Sanctuary's biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. The time for action is now and the proposed action plans should detail the necessary regulatory proposals for immediate development and implementation, so it is necessary revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Please look at the future of having "Ocean Parks" both

Federal and State. Look at California's MLPA program ongoing for state water no take parks that will border Federal sanctuaries. Protecting Marine Mammals must also protect there food source. Just like putting the wolf back into a eco-system you must consider when humanity must take a back seat to wildlife needs. In the long run this will create a tourism venue for the US for diving and other non take activties.
Thank you.
Patricia King

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. mary pendergast

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Elle Cook

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Edward Flounoy Jr.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Miss Cara Corzo

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
Even though the draft SBNMS Management Plan and Environmental Assessment (MP/EA) purports to support an Ecosystems Approach to Management(EAM) to protect the sanctuaries biotic, abiotic and historical resources, the various Action Plans are specific to fish, marine mammals, archeologic components, water quality,etc., with

response plans to address threats from specific sectors (commercial and recreational fishing; whale watching; transport through the ship channel to Boston; etc. What is missing is the integrated ocean management approach across resource protection categories/multisector human uses within the sanctuary. This would drive the ocean zoning approach and designation of compatible uses which is not addressed in detail in the MP/EA. The document needs to examine the approach utilized by the Canadian Dept. of Fisheries ?
ESSIM (Eastern Scotian Shelf Integrated Management Plan) which was recently published.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;

-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Sarita Southgate

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary.

When will the federal government realize that so many of our creatures are under threat? What will it take to make them listen?
Our ocean sanctuaries are supposed to be places of safety for the animals who live and/or visit them. But nothing is guaranteed these days. Sanctuaries seem to be in name only. Help change that by strengthening and improving the DMP for the Stellwagen Sanctuary.
Thank you for your time.

Sincerely,

Mr. Jake Hodie

Dear Superintendent MacDonald,

This letter concerns the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. This Sanctuary currently provides very little protection for the habitat and animals within its borders. I am concerned that your proposed plan does not increase protection. The plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. The proposed

action plans should include detailed regulatory proposals for immediate development and implementation.
I urge that the draft plan be revised to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. mark rush

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Heidi Andrade

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Betsy Tietjen

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Marcia Peterson

175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dr. James Grimes, DVM
951 W Bastanchury Rd
Fullerton, CA 92835-3425

Aug 21, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

This lazy, easy way of so protecting our oceans wildlife does not cut it. Our marine life needs protection in more then just a few miles of open water. Most marine life come to shallow waters to spawn, birth

their young, rest or simply just because they can. These shallow waters must be regulated from the harm of boaters and fisherman. The life of our oceans, our Marine life and our planet depend upon the safety of our oceans waters for the lives that dwell there. Lets not be selfish.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Nancy Roberts

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Gary Reese

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. COrina Marks
PO Box 39
Elk, CA 95432-0039

Dear Superintendent MacDonald,

These comments on the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary arise out of a general concern for an escalating world-habitat problem.
Although the wording after this paragraph is thanks to the Ocean Conservancy, I would like to make it understood personally how well I realize why urgent, positive, cooperative, and perhaps innovative action is needed to correct the balance of nature. The imbalances affect everything - our economy, morale, and defense as well as our health and habitat - and while I appreciate how impressive our evolution since the Industrial Age, it is now very important for our resource managers to get very serious about the up-side to paying heed now to all the warning signs and latest catastrophes.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Jonathan Walter

175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Miss Brandie Will

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not

increase protection.Yet, when I think of the word sanctuary, I think of a place offering protection, the very thing that is missing in the draft management plan..
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

A safe zone should be just that....safe. No over fishing, no bycatch, no harm to whales.It is simply spelled: S A F E.
Have a good day.

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Marion Moir

Dear Superintendent MacDonald,

After living on Cape Cod for two years, I became intimately aware of the Stellwagen National Marine Sanctuary--from its location to its

importance to the short sighted management that has continued to result in degraded health of the Sanctuary.

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection. As a critical nursery for fish and wildlife that

feul New England's economies, this lack of protection represents failed opportunity to protect a solid future for New England's marine heritage. Without fish and whales, what would New England become?? Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Lindsey Hiltabrand

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Candi Ausman

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. John Kaminski

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Katy Simmons

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Shannan Eid

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Ty Gram

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Terrie Meeks

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Joan Sadowski

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. James Roberts

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.

I worked on a whale watch out of Gloucester, MA with Ocean Alliance one summer. I spent everyday in the company of many magnificent whales species. What a moral injustice if we don't everything we can to

protect this marine habitat and all of the incredible animals that rely on it for their survival.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Jacob Boyd

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Meade Fischer

175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Sue Holtz

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. katie grotegut

175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Michael Sullivan
PO Box 32
Crestone, CO 81131-0032

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection. MARINE SANCTUARIES DO FAR MORE THAN JUST PROTECT BEACHES AND WATER QUALITY; THEY PROVIDE SAFETY FOR "OVERFISHED" SPECIES, PROTECTION OF SUNKEN CRAFT OF PERSONAL OR HISTORIC IMPORTANCE SO THEY ARE NOT LEFT TO THE GREED AND BARBARISM OF "PIRATES AND PROFITEERS" AND THEY ALSO ARE INSTRUCTORS OF THE PUBLIC ON THE IMPORTANCE OF SUCH MARINE SANCTUARIES TOWARD THE ONGOING HEALTH OF SEA LIFE AS MUCH AS NATIONAL PARKS AND SEASHORES ARE
TO THE LAND.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Judy Malley

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Carol Childerley

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. Because I am not as articulate as the person who wrote this form letter, I am sending it almost unchanged. And because I know that you will realize it is a form letter and not take it as seriously if I don't change it, that is why I have done so.
I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan will not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Yet no protection is offered. Time is of the essence. The proposed action plans should definitely include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop immediate regulations to reduce, if not eliminate, whale disturbance by ALL commercial and recreational vessels;
-Develop an immediate zoning plan with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring and a plan to ensure that ban;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you. I appreciate you considering my views.

Sincerely,

Ms. Krissa Dutton-Schandelmaier

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Marilyn Meyer

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Christiane Pistor

This is cool I have sent in comments that say to make SBNMS a "no-take marine zone".
MAKE Stellwagen Bank National Marine Sanctuary A "NO-TAKE MARINE ZONE"
IT IS IS IN THE BEST INTEREST FOR THE PUBLIC AT LARGE, NOT JUST COMMERCIAL EXPOILTS OF INTERESTED INDUSTRIES.
Thank you.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Janet Miller

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Klara Seddon

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen

Bank National Marine Sanctuary. I am very concerned that bycatch is not adressed. Bycatch is a problem around the world.
Your plan contains compelling information that the Sanctuary's biodiversity is at risk, that endangered whales are impacted by large commercial vessels speed. Loss of their food sources because of human activity is compromising the purpose of the Sanctuary.
Time is of the essence. The proposed action plans should include detailed regulatory proposals.
I urge you to revise the draft plan to contain the following in the final plan:
-Stop waste dumping where commercial fishing is occurring.
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves, limited-use areas ? recreational use.
-Develop regulations to ban fishing of forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Arlene Drewniak

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Christian Burgess

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Susan Phoenix

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Miss JENNY HALEY

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dr. Rosemary Meyers

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Frank X. Kleshinski

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Susan Carroll

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Susan Dragieff

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. As a physician, owner of a scuba dive shop, mother of a marine biologist peace corp volunteer, I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dr. Yvonne Hearn

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Susan Stevenson
