I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Chuck Dawson

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen

Bank National Marine Sanctuary. As a native of Rhode Island with family in Rhode Island and the Boston area, I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
I want my niece to be able to enjoy all that the marine sanctuary has

to offer, including whale watching, as she grows up. Thank you for your attention to my concerns.

Sincerely,

Mr. Eric Lane

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Quite simply, we are running out of time to protect this country's diverse creatures and their habitats.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Nancy Friedrich

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Molly Tomaseck

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Dev Reynolds

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Myriam Alaux

Dear Superintendent MacDonald,

I am writing today to comment on the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I fear that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan fails to increase protection.
I ask you to place the following provisions in the final plan:
-Regulations to reduce whale disturbance by all commercial and recreational vessels immediately;
-Develop a zoning plan complemented by regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dr. G. St.Onge

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Katie Garton

Dear Superintendent MacDonald,

I am writing about the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection. I have visited the Stellwagen Bank through the New England Aquarium and have seen multiple whales and other marine life there firsthand.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Please take these actions to protect this very special part of our oceans.
Thank you.

Sincerely,

Mrs. Robin Monserrat

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. James Wall

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Mary Vought

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Stephanie Fox

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides so very little protection for the habitat and

animals within its borders, and that your proposed plan seriously fails to increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly

fishing, is compromising the purpose of the Sanctuary. Clearly, time is of the essence and immediate action is necessary. The proposed action plans should include detailed regulatory proposals for development and implementation as soon as possible.
I urge you to revise the draft plan to contain the following in its final version:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Adopt the proposed draft 'Vision' as the Sanctuary's official guiding vision.
Thank you.

Dear Superintendent MacDonald,

WE MUST PRESERVE THE SEA LIFE!

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. John Curtis

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
PLEASE TAKE DECISIVE ACTION TO PROTECT THIS HABITAT AND ITS WILDLIFE.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Sam Miller

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Christopher Crame

As a 40year New England resident, it is as important to me to preserve

this great ocean sanctuary as any in the vast ocean. I now live on the

Gulf of Mexico and still feel the connection to New England through the beauty of the Sea.
Please protect our beautiful ocean and its' wonderful creatures.
Thank you.
Thank you.

Sincerely,

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Lennie Rodoff

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Julie Kozel

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Aaron Segall

Dear Superintendent MacDonald,

This is about the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I'm concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders as it is. Your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans must include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you and again, time is of the essence!
Please take action now.

Sincerely,

Ms. Pamela Kelly

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed Plan does not increase protection.
Your Plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly

fishing, is compromising the purpose of the Sanctuary. Yet the proposed action plans and future potential regulatory packages without full implementation until 2013 do not contain sufficient detail, commitment or timeliness to truly demonstrate your commitment to protecting Sanctuary resources.
I urge you to revise the Draft Plan to contain the following in the Final Plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designates no-take and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

WE, THE AMERICAN PUBLIC, WANT THIS AREA PROTECTED BECAUSE BY PROTECTING
IT, WE ARE PROTECTING OUR SELVES NOW AND IN THE FUTURE. POLLUTION IN OUR OCEANS OR DESTROYING THE BALANCE OF OUR WATERS, WILL RESULT IN DESTROYING OUR WATERS AND ULTIMATELY OUR LAND'S BALANCE.
LThank you.

Sincerely,

Mr. VINCE ?

Scituate, MA 02066

Dear Superintendent MacDonald,

As a member of Ocean Conservancy and someone who is concerned about preserving the natural habitat for marine life, I am writing to tell you I am dismayed to note that New England's only sanctuary for marine life, provides very little protection for the animals who live within it.
The plan of management you have proposed needs revision.
Please redraft it so that it will include the following:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you for your time and consideration.

Sincerely,

Mrs. J.L. Sramek

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Patricia Haverkamp

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Blake Payne

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Susan Lederle

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. John Hess

Aug 21, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary.
Stellwagen Bank encompasses nearly 1,000 square miles of deep sea basins, productive shallow banks, and a breathtaking wealth of marine life. Yet this "sanctuary" actually does very little to protect animals and their habitats. Whales are still endangered by

vessel traffic speeding into the Port of Boston; fishing activity still disrupts sensitive bottom habitats and discards unwanted species; and

large fishing trawlers compete with whales, tuna, and cod by harvesting the food fish that support this web of life.
Stellwagen Bank Sanctuary is in crisis. Compelling evidence documents the fact that human users are degrading the Sanctuary's wildlife,

whales, fish species, and shipwrecks. But to date managers at NOAA have done very little to protect this special place.

The proposed action plans should include detailed regulatory proposals for immediate development and implementation. I strongly urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. joyce faughn

I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Sharon Byron

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection. As I am from Portland Maine it is important to me.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision

While we still have a world, it is important that we use our efforts to make it a better place than it was when we arrived here.
Thank you for due consideration,
Thank you.

Sincerely,

Dear Superintendent MacDonald,

Re the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary:
New England's only Sanctuary provides very little protection for the

habitat and animals within its borders, and your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk; that endangered whales are impacted by vessels and loss of their food sources; and that human activity, particularly

fish-killing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
- Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels.
- Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use.
- Develop regulations to ban fishing on forage species such as sand lance and herring. And,
- Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Cindy Walsh

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dr. Mallika Henry

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Bridget Farrell

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. diane Arrieta

-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
I lived in that area of the country for many years and don't want to

see the outcome from a bad plan. The less time we spend protecting our valuable marine life, the faster many species become extinct. Each extinct species leaves a hole in the order of things and there are always consequences. Please revise the plan to truly make Stellwagen a sanctuary.
Thank you.

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. jill cresko

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Tamara Sedakow

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Yvonne Marshall

Dear Superintendent MacDonald,

I am very concerned that New England's only Sanctuary,the Stellwagen

Bank National Marine Sanctuary, provides very little protection for the habitat and animals within its borders, and that your proposed Draft Management Plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. The proposed

action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Gail Francis

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Hubert ?

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen

Bank National Marine Sanctuary. There is no measure less effective than calling it a sanctuary without protecting animals within it from human intervention. Think about it. While you're at it, you could also think about the following:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Nina Wouk

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Donna Chappell

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Roy Vanderleelie

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Barbara Buchanan

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Kathleen Dempsey

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Jolene Flaugher

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Josef Kozaka

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. Karla Devine

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Patrisa Philips
1335 Guardian Dr
Venice, FL 34292-1626

-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

Without protection of these vital habitats, even commercial enterprises will be harmed. Action must be taken to ensure the future survival of

interdependent lives, including our own. As Stellwagon Bank is our only National Marine Sanctuary in New England, it's important to all of us to protect it.
Thank you.

Aug 21, 2008

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mrs. brigitte tawa

Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Robin Schaef

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing as a concerned citizen in regards to the future of Stellwagen Bank National Marine Sanctuary. As New England's only sanctuary, your proposed plan should be designed with the maximum protection for the habitats and animals that reside within the area. Your plan illustrates the vital need for increased protection of the area through the determination that the Sanctuary's biodiversity is at great risk due to human caused activities such as loss of feeding resources, loss of endangered whales due to vessel collisions, and more.

Because of this, I ask that the proposed action plans include detailed

regulatory proposals for human activities that are negatively impacting the Sanctuary. To further prevent the degradation of the area and its inhabitants, the plan should undergo immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring
Thank you for your time.

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. This is a time when the temptation to take short-term convenience over long-term preservation is surely misguided. We've got to turn things around soon and I urge you to act as if the future of the world depended on you, because in a way, it does.
I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. George Halet

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Dear Superintendent MacDonald,

What is the point of labeling something a sanctuary if it is not adequately protecting the animals and environment?

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Marjorie Geri

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. RC Anderson

Superintendent Craig MacDonald
175 Edward Foster Road
Scituate, MA 02066

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed plan does not increase protection.
Your plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly fishing, is compromising the purpose of the Sanctuary. Time is of the essence. The proposed action plans should include detailed regulatory proposals for immediate development and implementation.
I urge you to revise the draft plan to contain the following in the final plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designate no-take research reserves and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Alan Stout

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed Plan does not increase protection.
Your Plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly

fishing, is compromising the purpose of the Sanctuary. Yet the proposed action plans and future potential regulatory packages without full implementation until 2013 do not contain sufficient detail, commitment or timeliness to truly demonstrate your commitment to protecting Sanctuary resources.
I urge you to revise the Draft Plan to contain the following in the Final Plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designates no-take and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.

Sincerely,

Mr. Anthony Montapert

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed Plan does not increase protection.
Your Plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly

fishing, is compromising the purpose of the Sanctuary. Yet the proposed action plans and future potential regulatory packages without full implementation until 2013 do not contain sufficient detail, commitment or timeliness to truly demonstrate your commitment to protecting Sanctuary resources.
I urge you to revise the Draft Plan to contain the following in the Final Plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designates no-take and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Ms. Judi Weiner

Your Plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly

fishing, is compromising the purpose of the Sanctuary. Yet the proposed action plans and future potential regulatory packages without full implementation until 2013 do not contain sufficient detail, commitment or timeliness to truly demonstrate your commitment to protecting Sanctuary resources.
I urge you to revise the Draft Plan to contain the following in the Final Plan:
-Develop regulations immediately to reduce whale disturbance by all commercial and recreational vessels;
-Develop a zoning plan immediately with accompanying regulations that designates no-take and limited-use areas in addition to areas for commercial and recreational use;
-Develop regulations to ban fishing on forage species such as sand lance and herring;
-Officially adopt the proposed draft 'Vision' as the Sanctuary's guiding vision.
Thank you.

Sincerely,

Mr. Jonathan Knowles

Dear Superintendent MacDonald,

I am writing in regard to the Draft Management Plan for the Stellwagen Bank National Marine Sanctuary. I am very concerned that New England's only Sanctuary provides very little protection for the habitat and animals within its borders, and that your proposed Plan does not increase protection.
Your Plan contains compelling information that the Sanctuary's

biodiversity is at risk, that endangered whales are impacted by vessels and loss of their food sources, and that human activity, particularly

fishing, is compromising the purpose of the Sanctuary. Yet the proposed action plans and future potential regulatory packages without full implementation until 2013 do not contain sufficient detail, commitment or timeliness to truly demonstrate your commitment to protecting Sanctuary resources.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Robert Levitt

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Linda York

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Karen Mueller-Harder

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Scott Davis

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

We need to save these magnificent endangered creatures!! PLEASE do not pollute or do anything to harm them!!!' And that goes for ALL the animals in the ocean!!!!!

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
MELANIE RODRIGUEZ

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Christine Vance

The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

I live right on the coast of the great Pacific Ocean and one of the joys of my life is the semi-annual migration of whales. To endanger this species is criminal!

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
