RAILROAD COMMISSION OF TEXAS

OIL & GAS

TOP OPERATOR/OFFICER ADDRESS DOWNLOAD

This publication was developed for the general public in response to inquiries concerning the availability of top operator/officer address information on floppy disks. Any requests for assistance with using this manual will be considered.

TABLE OF CONTENTS

I. GENERAL INFORMATION

Developed for: Users of Oil & Gas Organization Information
                    that has been ranked by production volume.

By: Railroad Commission of Texas
                    Information Technology Services Division
                    Debra Williams, Director

System Name: Oil and Gas forms P-1, P-2 and P-5
                    information from the oil ledger, gas ledger
                    and P-5 organization database.

Computer: IBM/Compatible

SYSTEM DESCRIPTION

This file contains information related to oil and gas
organizations that are operating oil and/or gas wells.
The organizations have been ranked by the amount of oil
or gas production in the last 12 months. The
organization name, primary address, name of the first
officer included on the form P-5, daily production and the
organization rank is written to a file compatible with
most PC software. The file, OGF410, is an ASCII file
with "}" delimiters. When both oil and gas
organizations are requested on one file, organization
ranking is removed.

Mainframe file name: S.OGF410   EBCDIC
Floppy disk file name: OGF410   ASCII

Delimiter is: '}' separated fields within the record.

The following COBOL file definition shows the contents and layout
of each record. The numbers to the far right under POSITION shows
the relative starting position of that field. To determine the
number of characters in a field, look at the PIC column. Following
the PIC is an "X" or "9". "X" indicates the field is alphanumeric.
"9" indicates the field is numeric only. The number following the
"X" or "9" tells the number of characters in that field. Each
record is 300 BYTES (characters) long. Definitions of each data
field can be found on the next few pages.

DATA DICTIONARY FOR TOP OPERATOR/OFFICER ADDRESS DOWNLOAD

OPRADDS-OP-OIL-GAS

    This datafield identifies why this operator was selected. "OIL"
    represents a selection due to oil production. "GAS" represents
    a selection due to gas production. "O/G" only appears when
    information is requested for both oil and gas operators and the
    organization on this particular record qualified due to both oil
    and gas production.

OPRADDS-OP-NAME

    Organization/operator name as filed on RRC organization report
    form (Form P-5).

OPRADDS-OP-ADDRESS1

    Operator's primary mailing address, line one.

OPRADDS-OP-ADDRESS2

    Operator's primary mailing address, line two.

OPRADDS-OP-CITY

    Operator's primary address - City.

OPRADDS-OP-STATE

    Operator's primary address - State.

OPERATOR-ZIPCODE

    Operator's primary address. A five digit zip code is always
    provided and can be found in OPRADDS-OP-ZIP. If a zip suffix is
    available, it will be appended to the zip code with a dash.
    OPRADDS-OP-DASH will contain the dash and OPRADDS-OP-ZIP-SUFFIX
    will contain the suffix.

OPRADDS-OP-P5-NUMBER

    Organization/operator ID number as assigned by the RRC (from
    Form P-5).

OPRADDS-OP-RANKING

    A five byte numeric field containing the operator's ranking.
    This will be zero when oil and gas operators are combined.

OFFICER-TITLE

    Title of officer.

OFFICER-NAME

    Name of a principal officer, partner, joint venturer, or
    trustee of the organization as reported to the RRC.

OFFICER-ADDRESS1

    Officer's primary mailing address, line one.

OFFICER-ADDRESS2

    Officer's primary mailing address, line two.

OPERATOR-ZIPCODE

    Officer's primary address. A five digit zip code is always
    provided and can be found in OFFICER-ZIP-CODE. If a zip suffix
    is available, it will be appended to the zip code with a dash.
    OFFICER-ZIP-DASH will contain the dash and OFFICER-ZIP-SUFFIX
    will contain the suffix.
