VOLUME II-MORTALITY

PART B

Section 9. Geographic Detail for Mortality: Tables

Total number of deaths, deaths from selected causes, infant deaths, neonatal deaths, fetal deaths, and selected rates. Tabulations shown by each State, county, specified urban places, population-size groups, metropolitan and non-metropolitan counties, urban and rural areas, and standard metropolitan statistical areas.

Section 10. Puerto Rico and Virgin Islands: Tables

Frequency tabulations for most variables shown in other sections in Volume II. General mortality rates by age, sex, and cause of death.

A brief summary of the contents for each section is listed above for the convenience of the reader. A complete table of contents is shown at the beginning of each section and is identified by a narrow black edge which can be located easily by fanning the pages. Each section is paged independently, using the section number as the identifying prefix.

Table 9-3. Total, Infant, and Neonatal Deaths and Rates, Fetal Deaths and Ratios, by Color for Standard Metropolitan Statistical Areas: United States, 1960

(By place of residence. Data refer only to events occurring within the United States, including Alaska and Hawaii. Deaths exclude fetal deaths. Fetal deaths include only those for which the period of gestation was given as 20 weeks or more or was not stated. Rates for total deaths per 1,000 population in specified group, enumerated as of April 1. Infant (under 1 year) and neonatal (under 28 days) mortality rates and fetal death ratios per 1,000 live births in specified group. Areas shown are those listed in Standard Metropolitan Statistical Areas issued in 1961 by the Bureau of the Budget, except for New England, where areas are metropolitan State economic areas established by the Bureau of the Census in 1960. For definitions of areas, see Technical Appendix)

NOTES

Geographic classification

Data are shown by both place of occurrence and place of residence in Puerto Rico for the primary geographic subdivision, "municipio," and in the Virgin Islands for St. Croix Island and for St. John and St. Thomas Islands combined. Deaths by place of residence are also shown for each urban place having a population of 10,000 or more according to the 1960 census.

Race and color

For 1960, deaths are not shown by color for Puerto Rico; they are classified as white and nonwhite for the Virgin Islands.

Cause of death

Rules governing the classification of cause of death are discussed under Classification of Data in the Technical Appendix, Section 7 in Part A of Volume II, *Vital Statistics of the United States, 1960.*
