INTRODUCTION

Data from Census 2000 are presented in three printed report series:

1. PHC-1, *Summary Population and Housing Characteristics*
2. PHC-2, *Summary Social, Economic, and Housing Characteristics*
3. PHC-3, *Population and Housing Unit Counts*

The data from Census 2000 were derived from a limited number of basic questions asked of the entire population and about every housing unit (referred to as the 100-percent questions, found on the "short form"), and from additional questions asked of a sample of the population and housing units (referred to as the sample questions, found on the "long form").

The PHC-1, *Summary Population and Housing Characteristics,* report series provides data based on the 100-percent questions. The subjects are age, Hispanic or Latino origin, household relationship, race, sex, tenure (owner- or renter-occupied), and vacancy characteristics. Land area measurements and population density also are provided. This series is similar to the 1990 census CPH-1 series.

The PHC-2, *Summary Social, Economic, and Housing Characteristics,* report series provides sample data based on both the 100-percent and the sample questions. Sample subjects include place of birth; residence in 1995; language; educational attainment and school enrollment; veteran status; disability status; employment status; journey to work; work status, earnings, income, and poverty status in 1999; physical housing characteristics; units in structure; fuel and equipment characteristics; owner and renter household characteristics, such as year owner moved into unit; home value; contract and gross rent; and mortgage and rental cost characteristics. This series is similar to the 1990 census CPH-5 series.

The PHC-3, *Population and Housing Unit Counts,* report series provides Census 2000 and historical comparisons of the 100-percent population and housing unit counts. It provides land and water area measurements, and population density. The user notes section documents geographic changes over the past decade. This series is similar to the 1990 census CPH-2 series.

In each series, there is one report for each state, the District of Columbia, and Puerto Rico, plus a United States summary report. Many tables in the United States summary reports include data for Puerto Rico.

HOW TO FIND GEOGRAPHIC AREAS AND SUBJECT MATTER DATA

This report includes a table finding guide to assist the user in locating those statistical tables that contain the desired data. The table finding guide lists alphabetically, by geographic area, the subjects shown in this report. To determine which tables in this report show data for a particular topic, find the subject in the lefthand column of the table finding guide and then look across the columns using the headings at the top for the desired type of geographic area. Figure I–1 is an example of a table finding guide.

The table finding guide does not include cross-classifications of subject-matter items. Additional information to locate data within specific reports is provided in the headnote at the top of the table finding guide and in the footnotes at the bottom of the guide.

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

Subjects covered in this guide are shown on the left side, and types of geographic areas are shown at the top. Table numbers shown in **bold** indicate that either all or part of the table is presented for the American Indian and Alaska Native population in American Indian and Alaska Native areas, or for the Native Hawaiian and Other Pacific Islander population in Hawaiian home lands. See PHC-2-A, *Summary Social, Economic, and Housing Characteristics, Selected Appendixes* for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

HOW TO USE THE STATISTICAL TABLES

Parts of a Statistical Table

The census data included in printed reports are arranged in tables. Each table includes four major parts: (1) heading, (2) boxhead, (3) stub, and (4) data field. A typical census report table is illustrated in Figure I–2.

The heading consists of the table number, title, and headnote. The table number indicates the position of the table within the report, while the title is a brief statement indicating the subjects and time reference of the data presented in the table. The headnote is enclosed in brackets and is located under the title. It contains statements that qualify, explain, or provide information pertaining to the entire table.

The boxhead is under the heading. This portion of the table, which contains the individual column heads or captions, describes the data in each vertical column. In the boxhead of many tables, a spanner appears across and above two or more column heads or across two or more lower spanners. The purpose of a spanner is to classify or qualify items below it or separate the table into identifiable blocks in terms of major aspects of the data.

16 Alabama — Summary Population and Housing Characteristics, U.S. Census Bureau, Census 2000

The stub is located at the left edge of the table. It includes a listing of line or row captions or descriptions. At the top of the stub is the stubhead. The stubhead is considered to be an extension of the table title and usually shows generic geographic area designations and restrictions.

In the stub, several features are used to help the user better understand the contents of the table. Usually, a block of data lines is preceded by a sidehead. The sidehead, similar to a spanner, describes and classifies the stub entries following it. The use of indentation in a stub indicates the relationship of one data line to another. Indented data lines represent subcategories that, in most instances, sum to a total. Occasionally in tables, it is desirable to show one or more single-line subcategories that do not sum to the total.

The data field is that part of the statistical table that contains the data. It extends from the bottom of the boxhead to the bottom of the table and from the right of the stub to the right edge of the page.

Both geographic and subject-matter terms appear in tables. It is important to read the definitions of the terms used in the tables because census terms often are defined in special ways that reflect the manner in which the questions were asked and the data were tabulated. Definitions of geographic terms are provided in PHC-2-A, *Summary Social, Economic, and Housing Characteristics, Selected Appendixes,* Appendix A. Census tables often include derived measures such as medians, means, percentages, and ratios. These and other subject-matter terms are defined in Appendix B of the same report.

Symbols and Geographic Abbreviations

The following symbols are used in the tables and explanations of subjects covered in Census 2000 reports:

- A dash "-" represents zero or a derived measure that rounds to less than 0.1.
- (X) means not applicable. In the 1990 and earlier decennial census reports, three dots "..." meant not applicable.

- (NA) means not available.
- The superscript prefix "r" indicates that the count has been revised since the publication of the 1990 census reports, or that the area was erroneously omitted or not shown in the correct geographic relationship in the 1990 census reports. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts,* report series.
- A dagger "†" next to the name of a geographic area indicates that there has been a geographic change (for example, an annexation or detachment, a new incorporation, or a name change) since the information was published for the 1990 census for that area. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series. The geographic change information for the entities in a state is shown in the "User Notes" section of the Census 2000 PHC-3 report for that state.
- A plus sign "+" is appended to the lower bound of the highest interval when the median falls in the upper interval of an open-ended distribution. A minus sign "-" is appended to the upper bound of the lowest interval when the median falls in the lowest interval of an open-ended distribution. For more information on medians, see the section on "Derived Measures" in Appendix B.
- A minus sign "-" preceding a figure denotes decrease. The minus sign appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts,* report series.

The following geographic abbreviations and terms may be used in the tables in this report:

- A "(part)" next to the name of a geographic area in a hierarchical presentation indicates that the geographic entity is located only partially in the superior geographic entity. For example, a "(part)" next to a place name in a county subdivision-place hierarchy indicates that the place is located in more than one county subdivision. (Places also may be "split" by county, congressional district, urban/rural, metropolitan area, voting district, and other geographic boundaries, depending on the presentation.) Other geographic entities also can be "split" by a higher level entity. The exception is a tabulation block, which is unique within all geographic entities in census products.
- ANVSA is Alaska Native village statistical area.
- ANRC is Alaska Native Regional Corporation.
- CCD is census county division.
- CDP is census designated place.
- CMSA is consolidated metropolitan statistical area.
- MA is metropolitan area.
- MSA is metropolitan statistical area.
- OTSA is Oklahoma tribal statistical area.
- PMSA is primary metropolitan statistical area.
- SDAISA is state designated American Indian statistical area.
- TDSA is tribal designated statistical area.
- UT is unorganized territory.

GRAPHICS

Charts, statistical maps, and other graphic summaries are included in some Census 2000 reports.

USER NOTES

User notes include corrections, errata, and related explanatory information. This section appears directly before the statistical tables in census reports. It presents information about unique characteristics of the report and changes or corrections made too late to be reflected in the text or tables themselves. However, sometimes this information becomes available too late to be reflected even in the user notes. Census 2000 user updates are available on the Census Bureau's Internet site at www.census.gov/main/www/cen2000.html. To receive notification of user notes, subscribe to the Census Product Update (http://www.census.gov/mp/www/cpu.html), a biweekly e-mail newsletter available from the Customer Services Center of the Marketing Services Office at the U.S. Census Bureau, or contact the Customer Services Center directly on 301-763-INFO (4636) or at webmaster@census.gov.

APPENDIXES

Appendixes A through E and Appendix H, described below, are found in the separate printed volume, PHC-2-A, *Summary Social, Economic, and Housing Characteristics, Selected Appendixes,* or on the Internet at http://www.census.gov/prod/cen2000/phc-2-a.pdf. Appendixes F and G are included in this report.

Appendix A, Geographic Terms and Concepts. Provides definitions of the types of geographic areas and related information used in census products.

Appendix B, Definitions of Subject Characteristics. Contains definitions for the subject-matter terms used in census products, including explanations of derived measures, limitations of the data, and comparability with previous censuses. The subjects are listed alphabetically. Population characteristics are defined first, followed by the definitions of the housing subjects.

Appendix C, Data Collection and Processing Procedures. Explains the enumeration and residence rules used in counting the population and housing units in the United States and Puerto Rico. It also describes the major components of the operational plan for Census 2000, and includes a glossary of terms.

Appendix D, Questionnaire. Presents a facsimile of the Census 2000 questionnaire used to collect the data in this report.

Appendix E, Data Products and User Assistance. Summarizes the Census 2000 data products by describing the information available in printed reports and through electronic media such as CD-ROM, DVD, and the Internet. It also describes Census 2000 maps and other geographic products, reference materials, and sources of assistance.

Appendix F, Maps. Contains maps depicting the geographic areas shown in this report.

Appendix G, Accuracy of the Data. Provides information on confidentiality of the data, imputation of housing unit status and population counts, sources of errors in the data, and editing of unacceptable data.

Appendix H, Acknowledgments. Lists many of the U.S. Census Bureau staff who participated in the various activities of Census 2000.

Table Finding Guide

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

Subjects covered in this guide are shown on the left side, and types of geographic areas are shown at the top. Table numbers shown in **bold** indicate that either all or part of the table is presented for the American Indian and Alaska Native population in American Indian and Alaska Native areas, or for the Native Hawaiian and Other Pacific Islander population in Hawaiian home lands. See PHC-2-A, *Summary Social, Economic, and Housing Characteristics, Selected Appendixes* for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

[1]State, District of Columbia, or Puerto Rico.

[2]Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

[3]County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

[4]American Indian and Alaska Native areas include state and federal American Indian Reservations; Oklahoma tribal statistical areas (OTSAs); tribal designated statistical areas (TDSAs) (federal areas); state designated American Indian statistical areas (SDAISAs) (state areas); Alaska Native village statistical areas (ANVSAs); and Alaska Native Regional Corporations (ANRCs).

[5]Tables for these areas appear only in the report for Hawaii.

User Notes

Additional information concerning this Census 2000 product and its source file, Summary File 3, may become available after this report is published. This information, called Notes and Errata, is available in portable document format (PDF) on the U.S. Census Bureau's Internet site at http://www.census.gov/main/www/cen2000.html. To receive notification of user notes, subscribe to the Census Product Update (http://www.census.gov/mp/www/cpu.html), a biweekly e-mail newsletter available from the Customer Services Center of the Marketing Services Office at the U.S. Census Bureau, or contact the Customer Services Center directly on 301-763-INFO (4636) or at webmaster@census.gov.

ADDITIONAL DEFINITIONS AND EXPLANATIONS OF THE DATA

Data Note 1

The user should note that there are limitations to many of these data. Please refer to the text for further explanations on the limitations of the data. See Appendix G of this report and the text found in PHC-2-A, *Summary Social, Economic, and Housing Characteristics, Selected Appendixes.*

Data Note 2

The Census Bureau is aware there may be a problem in the Census 2000 employment status data for people enumerated in group quarters. The problem may cause the labor force data for places, particularly those with high concentrations of people in group quarters (such as college towns with large dormitory populations) to overstate the number in the labor force, the number unemployed, and the percent unemployed, and to understate the number of employed. For more information, see the Census 2000 Notes and Errata document at the following Census Bureau Internet site: http://www.census.gov/prod/cen2000/notes/errata.pdf.

Data Note 3

Estimated population and housing unit totals based on tabulations from only the sample questionnaires (sample tabulations) may differ from the official counts as tabulated from every census questionnaire (100-percent tabulations). Such differences result, in part, because the sample tabulations are based on information from a sample of households rather than from all households (sampling error). Differences also can occur because the interview situation (length of questionnaire, effect of the interviewer, etc.) and the processing rules differ between the 100-percent and sample tabulations. These types of differences are referred to as nonsampling error. (For more information, see Appendix G.)

The 100-percent data are the official counts and should be used as the source of information on population and housing items collected on the 100-percent questionnaire, such as age, race, Hispanic or Latino origin, and tenure. This is especially appropriate when the primary focus is on counts of the population or housing units for small areas. For estimates of the number of people and housing units by characteristics asked only on a sample basis (such as education, labor force status, income in 1999, or year structure built), the sample estimates should be used within the context of the error associated with them.

Additional information on comparing sample estimates with corresponding 100-percent values is available on the Census Bureau's Internet site at http://www.census.gov/Press-Release/www/2002/sf3compnote.html.

Data Note 4

Median incomes for nonfamily households by race were calculated from a 38-category income distribution rather than the standard 39-category income distribution. The 38-category distribution collapsed the two highest categories ($175,000 - $199,999 and $200,000 and over) into a single category of $175,000 and over.

Data Note 5

Users may find slight differences in the Occupants Per Room calculations between those found in this report and those found in the Census 2000 Demographic Profile. “Occupants per room” is obtained by dividing the number of people in each occupied housing unit by the number of rooms in the unit. This report, based on Summary File 3, correctly uses a topcode value of “10 rooms” for those occupied housing units with “9 or more rooms.” In the Demographic Profile, an incorrect topcode value of “9 rooms” was used.
