Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Rich Georg

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
e e

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
annie phillips

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Susan Thurairatnam

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Chris Migotsky

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
John C. Seibert

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Patricia Funakoshi

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,

150 years ago Lobsters were fed to slaves because they were so abundant they were the cheapest food available. The same attitudes that have been shifted to do away with slavery now need to come to grips with the reality of habitat destruction at sea. It's very simple Lobsters are no longer cheap because they are no longer abundant. Time for another change of attitude...

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

This is a story of a small river in Wareham. I have written this to show an example of how delicate our eco-systems are and how important it is to take steps to protect them. On July 6th I left Martha's Vineyard and visited a family summer home in Wareham at Parkwood Beach on the West bank of the Crooked River. No sooner did I arrive did I hear from neighbors that there was a posted sign on our beaches stating there was "No swimming" per Wareham Board of health. The E-Coli levels were high enough to close it down.

I also learned that the culvert at the end of the river was

totally blocked with seaweed. I suspect seaweed is proliferating in the river due to the use of Nitrogen Fertilizers and the other chemicals used on properties on the East shore of the Crooked River and in other areas of the Buzzards Bay watershed.

A resident at Parkwood Beach also told of how they were walking on the along the river and came to the beach. It was low tide and on or around the first day the beach was closed. This person witnessed many Blue Crabs and Fiddler Crabs belly up and lifeless on the beach. This is an indication that something is polluting the water.

The proliferation of seaweed is most likely the cause of the blocked culvert--which is now too small to handle the influx of seaweed.
Now, our river does not flow through to the wet lands where the culvert once flowed through to. The wetlands are dried out. There is a very low level of stagnant water at the bottom.

Eventually this water flowed out to Little Harbor, Wareham--this no longer happens.

The careless development by homeowners on the East bank of the Crooked River in Wareham, MA at Standish Shores obviously plays a role in the destruction of our river and it's habitat. The cleared vista's and unnatural green lawns are evidence of their carelessness. Recently, these folks on the East Side of the Crooked River succeeded in building up an existing sandbar by bringing in and dumping new sand--they now have the luxury of having a beach at high tide. Thirty five years ago when I was a child the sandbar was only visible at low tide. The town ordered them to stop dumping sand but they did succeed in their goal. And I would suspect that the river suffers even more--because the tidal flow is affected. Also, people on the opposite shore have been scene "weedwacking" the Eel grass to expand their property lines.

I have always been protective of our natural habitat,

Sincerely,
Thomas McDonald

We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Glenn Byrnes

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Tara O'Sullivan

Stellwagen Bank is being damaged by habitat damage from aggressive fishing methods, chemicals, pesticides, long lived metals and petrochemicals. The result? Depletion of fish. That is clearly counterproductive.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Maria Oniga

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Lisa Parshley

Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Larissa Riker

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

This splendid example of a thriving, or once thriving ecosystem, can still be restored to its original home of diverse marine life. Global warming and acidity is taking a toll in our waters, and our land (acid rain). We still have the means to turn the tide around,(no pun intended), in the Mass. Bay/ Gulf of Me. area.
Dedicated teamwork is a requirement but a dream coming to fruition is within our grasps!

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by

diverse, healthy habitats in clean ocean waters.

Sincerely,
Karen Williams RN

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Pam Denman

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Stephie Diamond

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Marion White

We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

We have become aware of climate changes due to global warming, and know about warming oceans, but we mostly don't realize the fine balance of the ocean ecosystems which are also being involved. As time goes by, we will rely increasingly on the sea for food and water. It is imperative that we maintain as much protection for ocean ecosystems as possible.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Susan Bendickson

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Alu Gramor - Ari

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Ana Maria Carvalho

The areas around Boston needs to do a better job of protecting Marine Wildlife and all the waters, bay and Ocean. The technology is there to help clean up pollution. Heavy fines for companies and people caught polluting. There should be no time wasted in getting the jobs done to help prevent pollution.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Subject: Enact Stellwagen Bank Management Plan
Date: 07/17/2008 9:10:18 PM

Superintendent Craig MacDonald

Dear Superintendent MacDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary has a marvelous diversity of marine life, including whales, sea turtles, fish, birds and cold water coral. The Stellwagen Bank Management Plan is a needed first step toward protecting and restoring this ecologically important area.

Located across the threshold to Boston Harbor where Massachusetts Bay meets the Gulf of Maine, Stellwagen Bank is under assault from multiple fronts: habitat damage from trawling and draggers, ship collisions and depletion of fish. Pollution comes in many forms to Stellwagen. Nutrient loading from rivers and shores can cause algal and red tide blooms. Most insidious are long-lived metals, endocrine-disrupting chemicals, pesticides, and petrochemicals that bio-accumulate in animals and bio-magnify up the food pyramid. Invasive species displace indigenous animals.

Global warming is weakening all of Stellwagen's marine life by increasing the acidity of sea water. Animals and plants that spend a portion of their lives drifting in the plankton suffer most from acidification, followed by all who depend on them for food.

It is time for a comprehensive Stellwagen Bank Management Plan. I am writing in support of NOAA's efforts to bring this about. We must improve Stellwagen's resource conditions and the quality of lives. The plan must produce open and honest dialogue with all interest groups, informed by sciences, to lay the foundation for restoring and protecting Stellwagen's ecosystem.

Let's achieve the vision of a Stellwagen Bank teeming with a great diversity and abundance of marine life, supported by diverse, healthy habitats in clean ocean waters.

Sincerely,
Toby Wagner-Klein

Superintendent Craig McDonald

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

Ms. Barbara Leiterman

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.
I have personally enjoyed this sanctuary when approached by a very large whale when in a small boat. The whale approached and went under our 25 footer. It's was an awesome event. And the sanctuary should be preserved so that others may witness similar priceless activities.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Superintendent Craig McDonald

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

Mr. Ronald H. Silver, C.E.P.

- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.
-A prime destroyer of Stellwagen Bank, and Georges Bank, as well, is the work of draggers which totally destroy the entire habitat they

encounter. By last estimate, every square inch of these banks has been scraped clean no less than four times during each of the past three years. This information comes from the Department of Maine Fisheries. Results include species annihilation. Due to loss of all larger fish, the smaller ones dwindle, as they are mostly not of reproductive age.
-At least get a start on stopping one part of this travesty.
Sincerely,
Lea Kachadorian

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

Ms. christina clayton

Superintendent Craig McDonald

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

Ms. NK Acevedo

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I'm writing this letter on behalf of the Conservation Law Foundation. Marine habitat is under significant threat worldwide. It is essential that the entities which have been entrusted to behave as santuary's fulfill this role in more than a symbolic manner. We are rapidly getting to a point where these regions may be the only way to seed recovery in areas which have been less protected. Not carrying out a charter may significantly reduce the oceans capability of recovering from the damage we continue to inflict upon it.
I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that

call Stellwagen Bank Sanctuary home.

- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.
While it's too bad the fishing industry might be affected by further restrictions, let's all recognize the obvious fact that commercial fisheries are not sustainable the way they're currently managed, and we must do what's possible to protect the few remaining resources in the Atlantic.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Superintendent Craig McDonald

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

Ms. S.A. Green

Superintendent Craig McDonald

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

Ms. Joyce Cusimano

Superintendent Craig McDonald

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Dear Superintendent MacDonald: Superintendent McDonald,

The Gerry E. Studds Stellwagen Bank National Marine Sanctuary was designated in 1992 in recognition of its nationally outstanding ecological value and the need to protect this ocean treasure for future generations. However, the recently released draft sanctuary management plan paints a grim picture of Stellwagen and the destructive impacts of human activites including bottom trawling and commercial shipping. Today Stellwagen is a sanctuary in name only. The proposed management plan is woefully inadequate and provides no real and immediate protections for ocean wildlife or habitat. This must change for Stellwagen Bank National Marine Sanctuary to live up to its name and deliver on its ocean stewardship responsibility to the American people. I urge you to develop a final management plan for Stellwagen Bank National Marine Sanctuary that:
- Manages all commercial and recreational activities inside the Sanctuary;

- Immediately identifies and protects vulnerable seafloor habitats from harmful bottom trawling and other harmful human activities;
- Protects herring, sand lance and other critical forage fish that provide a source of food for whales, tuna, cod, and other ocean wildlife;
- Inventories and protects maritime heritage sites;
- Improves monitoring and protection of water quality; and

- Manages shipping, fishing and whale watching boats to stop endangered whales from being disturbed, entangled or killed while they try to raise and feed their young.

Stellwagen Bank can no longer be a Sanctuary in name only. I expect real leadership and urge you to craft an effective management plan that will fully protect and restore the diversity of the ocean wildlife that call Stellwagen Bank Sanctuary home.

Sincerely,

Ms. Megan Stembridge

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

? End bottom trawling wherever it threatens to destroy the Bank?s fragile floor;

? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank?s whales; and

? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

â€¢ Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

â€¢ End bottom trawling wherever it threatens to destroy the Bankâ€™s fragile floor;

â€¢ Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bankâ€™s whales; and

â€¢ Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

â?¢ Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

â?¢ End bottom trawling wherever it threatens to destroy the Bankâ??s fragile floor;

â?¢ Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bankâ??s whales; and

â?¢ Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â• End bottom trawling wherever it threatens to destroy the BankÂ's fragile floor;

Â• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ's whales; and

Â• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I am a lifelong Massachusetts resident who is concerned about insidious changes to our environmental policies in our oceans. I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

? End bottom trawling wherever it threatens to destroy the Bank?s fragile floor;

? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank?s whales; and

? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â• End bottom trawling wherever it threatens to destroy the BankÂ's fragile floor;

Â• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ's whales; and

Â• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I strongly urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful commercial practices threaten the whales there and the entire ocean ecosystem upon which they depend.

It is imperative that we seriously review and adapt all activities which impact, either directly or indirectly, our marine ecosystems and the organisms which depend on them for their survival. Overlooking these impacts for short-sighted considerations of profit or convenience is simply no longer and option.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

â?¢ Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

â?¢ Restrict shipping activities so as to mitigate the effects of ship noise on the natural ability of whales to communicate underwater using sound;

â?¢ End bottom trawling wherever it threatens to destroy the Bankâ??s fragile floor;

â?¢ Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bankâ??s whales; and

â?¢ Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

Please protect the Right and Humpback whales of Stellwagen Bank.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

â€¢ Keep industrial shipping out of the Bank in order to prevent huge ships from striking the whales;

â€¢ End bottom trawling wherever it threatens to destroy the Bankâ€™s fragile floor;

â€¢ Ensure that factory fishing vessels leave enough plankton, herring and other food for the Bankâ€™s whales; and

â€¢ Enforce the rules designed to prevent whales from being tangled in discarded fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

? End bottom trawling wherever it threatens to destroy the Bank?s fragile floor;

? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank?s whales; and

? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

? End bottom trawling wherever it threatens to destroy the Bank?s fragile floor;

? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank?s whales; and

? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

? End bottom trawling wherever it threatens to destroy the Bank?s fragile floor;

? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank?s whales; and

? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

- Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

- End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

- Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

- Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Sir/Madam (Marine Sanctuary Superintendent for Stellwagen Bank),

As a principal species on this planet, we need to protect those less able to protect themselves. This includes the Right and other whales. I truly hope that you understand how each species is part of the link of life here, and so far we humans aren't able to transfer ourselves elsewhere to another planet, since we certainly are a major part of the current problem on earth of living in a sustainable manner.

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

â€¢ Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

â€¢ End bottom trawling wherever it threatens to destroy the Bankâ€™s fragile floor;

â€¢ Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bankâ€™s whales; and

â€¢ Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Thank you, and I wish you every success in doing your part to preserve what is essentially a "wilderness area" of the ocean.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

Below are the standard details, as provided by those who watch these things. But generally, in my own words: Can anyone believe that Dick Cheney, and others who are interested only in their own profit-margins, have a clue (or a care)about what matters to the environment ? Not listening to involved scientists' views on ecology is like not listening to your generals's views on the consequences or war... oh, right: those guys didn't listen to their generals either...

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

? End bottom trawling wherever it threatens to destroy the Bank?s fragile floor;

? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank?s whales; and

? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

? End bottom trawling wherever it threatens to destroy the Bank?s fragile floor;

? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank?s whales; and

? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I write to you in the hope that you will protect the whales that feed and mate at Stellwagen Bank every year. It has come to my attention that federal officials are in the process of coming up with a new plan for managing Stellwagen Bank. I urge you to please put in place the strongest protection for these endangered whales as possible.

Thank you for your attention in this matter.

Sincerely,

Julia Baier

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

Â? Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

Â? End bottom trawling wherever it threatens to destroy the BankÂ?s fragile floor;

Â? Ensure that factory fishing vessels leave enough plankton, herring and other food

for the BankÂ?s whales; and

Â? Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Like all life on earth, these members of the largest mammals deserve protection and preservation. In this century it seems that we can, together, prevent extinctions from occuring, especially when this issue appears to be so well undrestnood. Please help prevent 'big business' from endangering these animals further.

Sincerely,

Marianne Moore

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.

Dear Marine Sanctuary Superintendent for Stellwagen Bank,

I urge you to protect the Right and Humpback whales of Stellwagen Bank. Stellwagen Bank is supposed to be a marine sanctuary, but harmful practices threaten the whales there and the entire ocean ecosystem upon which they depend.

To make Stellwagen Bank a true marine sanctuary, I urge you to:

• Keep industrial shipping out of the Bank in order to prevent huge ships from

striking the whales;

• End bottom trawling wherever it threatens to destroy the Bank's fragile floor;

• Ensure that factory fishing vessels leave enough plankton, herring and other food

for the Bank's whales; and

• Enforce the rules designed to prevent whales from being tangled in discarded

fishing nets.
