CONTRACT DATA REQUIREMENTS LIST
(1 Data Item)

Form Approved
OMB No. 0704-0188

The public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Services and Communications Directorate (0704-0188). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. **Please do not return your form to the above organization. Send completed form to the Government Issuing Contracting Officer for the Contract/PR No. listed in Block E.**

8. APP CODE	11. AS OF DATE	13. DATE OF SUBSEQUENT SUBMISSION
N/A		SEE BLK 16

16. REMARKS

The SAR shall identify all hazards associated with the system hardware and software design, the specific design features employed to eliminate or control the hazard; and shall provide verification of compliance to safety requirements. Each hazard, whether safety or health shall include the classification of hazard severity and probability of occurrence. The contractor shall include when the hazards may be expected to occur, whether under normal, unusual operating or maintenance conditions. In the event the system is modified or procedural changes made after the final SAR is submitted, the contractor shall update the SAR to reflect those modifications or changes. The SAR and its associated Hazard Reports will provide the basis for the development of Safety and Health releases required prior to test or operation of the supplied item(s) and also establish special procedures and/or precautions to be observed by our test agencies and system users. The final SAR is subject to TACOM LCMC approval.

Examples of safety hazards to be included in the report are fire prevention issues, ergonomic hazards; sharp edges/moving parts, physical hazards (heat or cold stress, acoustical energy, vibration, etc.), chemical hazards (flammables, corrosives, carcinogens, etc.), toxic fumes (exhaust emission hazards), ionizing and non-ionizing radiation, electrical issues and noise.

The Health Hazard Assessment portion of the SAR shall identify human health hazards; evaluate proposed hazardous materials and processes using such materials. Include in the report proposed measures to eliminate the hazards or reduce the associated risks when the hazards cannot be eliminated and make recommendations concerning engineering controls, equipment, and/or protective procedures to reduce the associated acceptable risk. A health hazard is an existing or likely condition, inherent to the operation, maintenance, transport or use of materiel that can cause death, injury, acute or chronic illness, disability, or reduced job performance of personnel by exposure to physiological stresses. Identified hazards shall have recommended engineering controls, equipment, and/or protective procedures to reduce the associated risk.

BLOCK 12 and 13: Draft to be delivered 90 days prior to PQT BEB testing. Government comments will be provided no later than 30 days after receipt of draft. Final report to be delivered no later than 30 days after receipt of Government comments.

BLOCK 14: E-mail delivery per e-mail addresses on BEB IPT List.
Repro = electronic copy
