Levee System Modification Permit Package Checklist

For Proposed Modification of a Levee System

- ☐ 3 signed original copies of permit form – CELRL-803 (latest revision), signed by both the permittee (commercial interests, private owner) and permitter (local sponsor).
- ☐ Plan view, Details, and Specifications – specific to the modification affecting the levee/floodwall in hardcopy format; 11x17 size drawings on a CD in PDF format.
- ☐ As-Built stationing; beginning and ending levee/floodwall stations of affected sections.
- ☐ GPS information (geographic coordinates) for location of proposed work.
- ☐ Permit will be approved by the USACE after an 11x17 hard copy of drawings and CD containing a full set of all bid documents (plans and specs) have been provided with final permit submittal for signature.

Note: *If all of the above check points have been met, the submittal will be considered complete. If any information detailed above is not included in the submittal, the USACE will notify the permitter of lacking information and the permit will need to be resubmitted with this information.*
