

INSTRUCTIONS

1. All Volumes must be corrected to 14.65 psia and 60° F.
2. The addresses as required on this report shall be clear and definite as to street number, city and state.
3. This report is required of all Carbon Black Plants manufacturing carbon black from natural gas.
4. This report is required to be filed in two duplicate originals with the Railroad Commission District Office in which the plant is located as soon after the first day of the month as possible, for the preceding month, but never later than the fifteenth day of the following month.
5. Please use typewriter if possible.
6. Show raw gasoline plant or refinery vapors in column C, Section 1, "Kind of Gas" as "Vapors". If raw gas is received in the plant show the kind of gas as "sweet," "sour," or "casing-head." If residue gas from processing plants is received in the plant show in column C, Section 1, "Res. Sweet," "Res. Sour," or "Res. Casinghead," or "Res. Commingled" (Comm.).
7. Liquefied Petroleum gases received into the plant and commingled with other gases in the manufacture of carbon black are required to be reported in barrels of 42 U.S. gallons. Do not use fractions of thousands of cubic feet of gas, or fractions of barrels of liquids on this report.
8. In Section III, column A, show classification of carbon black, etc. In column B show grades of each type of black.
