**Language for Inclusion in SWR 9/46 to allow recycling of incidental solid oil & gas waste by operator of commercial disposal well.**

**The operator of a commercial disposal well with a permit issued under this (section/rule) may recycle solid oil and gas waste that is incidental to the processing of authorized injection fluids prior to injection, provided that**

- (1) the operator of the disposal well is responsible for the recycling and related activities,**
- (2) the operator provides written notification to the appropriate district office seven days before recycling operations are expected to begin and includes information on how solids will be controlled and contained during the recycling operations,**
- (3) the treated solids are tested and meet the limits set forth in §4.259(d) prior to being used as a recycled product and**
- (4) the operator provides written notification to the appropriate district office within seven days of concluding recycling operations. Such recycling is authorized by this (section/rule).**
