<sup>a</sup>A health effects evaluation will be posted at this location once available.

If a health effects evaluation has not been finalized only the laboratory analysis results will be posted at this location.

<sup>b</sup>ACL = Air Control Laboratory

\*On June 16-18, 2010, the TCEQ collected 23 one-hour aldehyde (formaldehyde) and ketone samples in and around the Town of DISH, Texas. The Laboratory Analysis Results for ACL No. 100648 provides the analysis of the 23 samples. Please note that agency's air monitoring comparison values (AMCVs) for formaldehyde are: odor – 500 parts per billion by volume ( $ppb_v$ ) and short-

term health based  $-41 \text{ ppb}_v$ . Furthermore the 2007 and 2008 annual formaldehyde averages for Texas were 2.40 ppb<sub>v</sub> and 2.44 ppb<sub>v</sub>. Health effects evaluations from the agency's Toxicology Division will be made available as they are completed.
