§§3.9 and 3.46: Amend to incorporate requirements related to seismic events for disposal wells

§§3.9 and 3.46: Amend to incorporate requirements related to seismic events for disposal wells

I believe oil/gas companies should be held accountable for their actions. There should be rules and regulations in place by the state of Texas to protect property owners from seismic activity caused by fracking. I'm not against the gas wells, but I feel like everyone in that business should be following the same regulations issued by the state of Texas in regards to fracking and waste. Be responsible and show us that you have Texans in your best interest. Thank you.
