§§3.9 and 3.46: Amend to incorporate requirements related to seismic events for disposal wells

§§3.9 and 3.46: Amend to incorporate requirements related to seismic events for disposal wells

Seismic activity from disposal wells is a liability issue and RR Commission needs to do something about it. If rules are not put in place, can we sue the city for damages from my home's foundation cracking after an earthquake? The true cost of allowing disposal wells includes ALL costs due to damage from seismic activity. If the cities actually had to pay/calculate this, they would no longer allow the wells. Have them be required to buy insurance and again the actual cost of these wells will be calculated for them.

Thank you

Alisa
