

# CYCLE OF FRACKING DENIAL

1 **Industry and government say:  
NO PROOF  
of contamination**

Landowners tell industry and government about their air, water and land contamination by industry.

**PROOF  
IS FORCIBLY  
HIDDEN**

Landowners **PROVE**  
contamination

2

Landowners pay for environmental testing and obtain documented proof.

3

Landowners sue industry, receive settlements, but are required to sign non-disclosure agreements

Filing a lawsuit is typically a landowner's only recourse. Industry's out-of-court settlements require non-disclosure agreements so the documented proof is hidden away from public.
