Subject: Chapter 18 proposed changes

the changes to 18.8:

(G) the goes along with (f) having to mark every 20 feet is not always practical, when locating miles of transmission line. and now adding this to the rule doubles the work load and expense. this needs to have some exceptions. (example: locating 2 miles of all same size steel line) why have ever 20 feet and now size and stl on ever other mark?
