§3.70: Amend T-4 pipeline permit procedures

§3.70: Amend T-4 pipeline permit procedures

i personally feel that this ruling should be changed, it is outdated due to the one-sided power given to these companies. MY neighborhood has been affected very deeply, our property values have been decreased, our lives have tremendous put in danger. Some companies did not identify themselves to the community properly, they did not maintain the minimum tolerance zone (CROSS-TEX LNG) IN OUR NEIGHBORHOOD. We were not given the MSDS data sheet. Our city, county, state and federal did not serve our community (HIDDEN VALLEY ESTATES SUBDIVISION) WELL at all.

Also there is a questionable conflict with the PHSMA ordinance (195.210) pipeline location. This ordinance says that no pipeline is to be located within 50 feet (15 meters) of any dwelling, industrial building or place of worship where people work, congregate or assemble.

We certainly hope these matters be addressed in the near future and resolved.
