§3.70: Amend T-4 pipeline permit procedures

§3.70: Amend T-4 pipeline permit procedures

I oppose the proposed gas pipelines that would run from the Waha Oil and Gas Field around Coyanosa into Mexico.

If they must be built, then I request the following in order to further insure the safety of our environment:

- o The pipes should be built as one continuous international pipeline so that State Department approval is required and an Environmental Impact Study is required.
- o NO segmenting of the pipeline (i.e., building a Texas segment and a Mexican segment which are then connected at the border) because that would place the oversight in the hands of the Texas Railroad Commission, which could eliminate the need for State Department approval and an Environmental Impact Study.

Thank you very much for your time and consideration of these issues.
