Importance: High

16 TAC §3.70

The Railroad Commission of Texas (Commission) proposes amendments to §3.70, relating to Pipeline Permits Required. The Commission proposes the amendments in order to clarify and more specifically prescribe the procedure by which a pipeline operator may identify itself as a common carrier, gas utility, or private line operator when applying for a new T-4 permit to operate a pipeline or when renewing, amending, or cancelling an existing T-4 permit.

The Commission proposes amendments in subsection (a) to reword the requirement that certain pipeline operators must obtain a T-4 permit, renewable annually, as provided in this rule...

Dear Rail Road Commissioners,

The Presidio Municipal Development District has been working for years to bring a natural gas pipeline to Presidio, Texas. It is key to our growth as a city. We trust that the RRC will implement the best practices rules that will construct natural gas pipelines to our friends in the State of Chihuahua. We feel that is a win-win for all concerned. The PMDD is in support of rules that will accommodate the construction of the Texas Mexico pipeline.

Sincerely
Brad Newton
Presidio PMDD Executive Director
