

Bristol Bay, Alaska is the richest wild salmon fishery in the world.

President Obama — please keep it that way and stop the Pebble Mine.

**OUR JOBS, OUR ECONOMY,
OUR FAMILIES, DEPEND ON YOU.**

The Bristol Bay Salmon fishery supports 14,000 jobs and feeds the world. Yet a multinational mining corporation plans to destroy salmon streams and leave us with billions of tons of toxic waste.

Alaska Natives, commercial fishermen, sportsmen, jewelry retailers, churches and supermarket owners around the country are urging the Environmental Protection Agency to protect the fishery under the Clean Water Act.

The science is clear. Mining the Pebble deposit will destroy salmon and their habitat.

STOP THE PEBBLE MINE.
