That's ok. The press will be looking for the rule. But once it's signed, we have time on the 12th to load the rule on the website. The rtc can follow later that day. I guess we have to rely on technical corrections later, after rule is fr'd.

We've been waiting for secondary std comments. They're p.o.'D about the separate std. . I can call around, since the hornets are already worked up, I can't do much harm. Gys

I understand he wants it by 11 AM. I think we should be able to get the package to him by then, but I won't know for sure until we know what is happening on the secondary standard. We've received no comments on that so far and I don't know when they might come in. We plan to work on the RTC throughout the day and evening on March 12, so that won't be completed until around 9 PM on the 12th--at least I hope it's done by 9 PM.

Subject Ozone Timing

Lydia: Just called to make sure you were aware of the timing. Charles I. wants the entire package by 11 AM on the 12th. because of the importance of the package and the need to notify folks, plus a planned 1PM on the 12th press conference, we can't count on any 11:59 PM signings. This also means closing the loop on comments from, and responses to, our friends on 17th street and Jackson Place, among any others.
