“Today’s Environmental Technologies—Innovative Solutions for Regional Issues”

Mark your calendars and join us on October 7-8, at EPA Region 2 in New York City to learn about new technology to help solve environmental challenges and provide your input about future needs. The workshop will feature an exciting array of technologies developed and verified with EPA’s support. [Region 2](#) will present their high-priority needs for technology solutions. The EPA Environmental Technology Verification ([ETV](#)) and Small Business Innovation Research ([SBIR](#)) Programs will highlight innovative technologies for air, water, soils and surface monitoring; drinking water treatment; greenhouse gas mitigation and cleaner energy; wastewater infrastructure, treatment and reuse; and air pollution control.

Attend this workshop to:

- Hear from EPA scientists, research collaborators, technology users, and technology developers responsible for developing, verifying, and using these technologies
- Get a closer look at some of the technologies at the workshop’s innovative products exhibition
- Participate in in-depth discussions on technology areas of interest with the aim of establishing new collaborations among ETV, SBIR and Region 2 and its constituents
- Provide your input about future environmental challenges and needs.

The workshop is free and open to all. Environmental professionals and the general public are encouraged to attend. Take advantage of this great opportunity to learn more about two of the Office of Research and Development’s key technology programs and the solutions they support, and to help develop projects to work together on developing and verifying new technology.

For more information or to register on-line, please visit <http://www.scgcorp.com/etvsbir08/>. Questions can be directed to Abby Waits, EPA, at (513) 569-7884 or waits.abby@epa.gov.
