A

Note... I am very pleased to be with you today. I will be brief - the current system that we believe is helping people with disability succeed is so cumbersome and holds such barriers that it is oftentimes exhausting. I'm so glad my mom is here to help me but I need to know that I would access to someone who knows what I need and works with me to make sure I can continue to live independently. But even now there are many barriers that keep me from

earning income and to move towards independence. Housing, Transportation and personal care assistance often rely on such restrictive income eligibility or disability eligibility that as you start to succeed things continue to get taken away from you.

I would hope that this commission will look at the whole system of health care financing and home and community based

services in all aspects  
Medicaid  
Medicare  
Social Security both SSI and SSDI  
Private Health Insurance  
and unique issues of dual eligibles like myself.
