A. Upcoming Events

None

B. Current

None

II. Notable Congressional Activity

None

III. Press Inquiries/Media

USGS scientist Kate Kendall, from the Northern Rocky Mountain Science Center, was contacted by Vanessa Brown, a news reporter from KCFW television station in Kalispell, MT. Brown was interested in huckleberry ecology and its importance to bears for a story that aired at 6:00pm on July 10th.

USGS research ecologist Katherine Kendall and her grizzly bear research are part of the feature article 'Flathead's Grizzly Bear Pioneers' written by Becky Lomax in the July/August 2007 issue of Flathead Living Magazine.

USGS scientist, Kate Kendall, was contacted by Sonja Lee from Montana Magazine on July 16 regarding progress on the Northern Divide Grizzly Bear Project (<http://nrmsc.usgs.gov/research/NCDEbeardna.htm>) and the status of the grizzly bear population. The article on recovery of the northern Continental Divide grizzly bear population will be the cover story for the September issue of Montana Magazine.
