FAT AND CALORIE COUNTER

## FAT AND CALORIE COUNTER

More than 1,500 foods,  
including regional foods from  
all parts of the United States.

Complete information on  
**FAT GRAMS • CALORIES**

## Acknowledgments

The fat gram and calorie values in the Fat Counter were calculated using the Nutrient Data System (NDS, version 2.8) from the University of Minnesota Nutrition Coordinating Center. Appreciation is expressed to Antoinette Angeles, Bonnie Gillis, Holly Henry, and Gaye Koenning for their conscientious work in researching the nutrient values and to Carolyn Huffmyer for her preparation of the manuscript. The nutritionists from the Diabetes Prevention Program and Women's Health Initiative provided valuable suggestions for improving this guide.

and Kidney Diseases, National Institutes of Health.

## About the Fat Counter

The Fat Counter is designed to help you keep track of the number of fat grams and calories you eat. It shows the grams of fat and calories for more than 1,500 commonly eaten foods.

Foods are listed from A to Z.

Regional foods are at the back of the book.

Please note:

- If the food is described as having the “skin removed” or fat “trimmed,” this has been done before cooking.
- Cooking methods are without added fat unless described differently (for example, “stir-fried”).
- Serving sizes are after cooking (if any) and with only the parts to be eaten (for example, no bone).
- Modified foods (low-fat, diet, etc.) are described as such.
- Foods containing “mayo” are prepared with imitation mayonnaise.

If you eat manufactured products such as frozen dinners or store-bought cookies, look at the food label to find the grams and calories. You can add these and other foods that are not in the Fat Counter to the blank pages at the back of the book.

ITEM	SERVING	FAT (g)	CALORIES
<b>A</b> nchovies, canned in oil, drained (1 can = 2 oz)	1 can	4	94
Apple, 2 3/4" diam	1 each	0	81
