

User Telecom
Tuesday, June 12, 2007
Minutes

Attendees: Jim Rogers, Doug Kothe, Bobby Whitten, Trey White, Bill Renaud, Chris Larkin, Chris Fuson, Don Frederick, and Lisa Rael, ORNL; Stephane Ethier, PPL;

- **Announcements**

NCCS Scaling Workshop, to be held at ORNL July 30 - August 1 was designed to get users up-to-speed on the new machine. Planned talks include AMD, Quad-core, and machine features. The deadline for Foreign Nationals to register is June 19.

Science Highlights: Doug Kothe and Jayson Hines are working to update the template by the end of this week or first of next. The template will be sent to each projects' liaison, who will then forward to the PIs. Highlights will be due at the end of June.

- **INCITE Projects**

Each project liaison has notified the PI of underutilization. Please note that many projects have used very little, if any, of their allocation and we're working hard to change this.

- **I/O on Jaguar**

Several meetings have occurred regarding I/O. Jeff Larkin and Mark Fahey have worked together on tips for using I/O on Jaguar, which have been posted on our website at <http://info.nccs.gov/resources/jaguar/iotips>. The Technology Integration Group has also developed a couple of packages for the users use and we will continue to coordinate with them to ensure all issues and concerns are covered.

- **Email List**

If you'd like to receive information about the machines, downtimes, etc. please be sure to subscribe to our email list. To subscribe, please follow this link:
