

Subject: ICCVAM 5 year plan  
Date: Tuesday, May 29, 2007 12:45 AM

To Whom it may concern,

I believe in animal free testing and cruelty free research. Please stop needlessly killing animals when non-animal tests could be adopted instead. Non-animal testing methods have been demonstrated to be more accurate, more sensitive, and more protective to public health.

I will be writing my public officials regarding this matter and will be asking them to support PETA's Appropriations Request.
