Dear Sirs,

The United States agency overseeing the development of non-animal test methods, the Interagency Coordinating Committee for the Validation of Alternative Methods (ICCVAM) has approved only one non-animal test method originating in the U.S. A shameful record when ICCVAM's European counter, ECVAM, has approved dozens.

Rather than being a vehicle to support development and adoption of animal-free testing, ICVAM has done little in comparison to what can and should be done. As a result, animals continue to needlessly die and human health suffers as animal tests continue to lead to less accurate and less sensitive information regarding human health.

You must please alter this terrible situation.

Dr. John F. Doorish
