

Subject: Please through Jesus, Mary and Joseph and St. Francis start non-animal test methods

Date: Friday, June 1, 2007 10:14 PM

From: H McDonnell

Please accept internationally validated non-animal methods, including non-animal test methods for skin and eye irritation, phototoxicity, and pyrogenicity (fever induction), and to follow the additional December 2006 recommendations of the animal protection community <<http://www.stopanimaltests.com/pdfs/ICCVAM-5yearplan-Final.pdf>> .

God bless you

2,000 pounds of grains are supplied to livestock to produce enough meat and other livestock products to support a person for a year, whereas 400 pounds of grain eaten directly will support a person for a year. Thus, a given quantity of grain eaten directly will feed 5 times as many people as it will if it is eaten indirectly by humans in the form of livestock products....

M.E. Ensminger, PH.D.

why not go vegan for a night and save someones life?
