Comments: Dear Sir,

I am writing to inform you that I support development and adoption of animal-free testing. I have just learned that ICVAM has approved of only one non-animal test method originating in the U.S. although EVCAM, your European counter, has approved dozens. Rather than supporting development and adoption of animal-free testing, ICVAM has done little in comparison to what can and should be done. Therefore animals continue to die needlessly. Human health also suffers as animal tests continue to lead to less accurate and less sensitive information regarding human health.

Animal testing is archaic and inhumane. The sooner it is abolished the better. Please do all you can to work toward this end. Thank you.

Eileen Hennessy
