Comments: There is no way that animal testing has helped mankind. Their systems are different than ours. If you pour bleach in an eye, of course it will burn and ruin the eye (animal or man). If you need to test on something or somebody, test on the criminals on death row or doing life terms. Let them pay something back to society. Do some testing on all these illegal immigrants.

In this day and age when 95% of the people in this world have lost their membership cards to the human race, there are still those few who will stand up and speak for those who cannot speak for themselves. There is a special place in hell for those who abuse and neglect animals and on the level in hell just below them are the people who do the animal testing.
