Comments: To Whom It May Concern;

I believe it is vital for the well-being of all people in this country, as well as for our standing in the world, to be in the vanguard of non-animal testing.

In addition to the inherent cruelty of such practices, it has been shown that such testing does not necessarily indicate the human responses to the objects being tested. We are being cruel and inhumane for no good reason at all.

To quote Mahatma Gandhi:

â• The greatness of a nation and its moral progress can be judged by the way its animals are treatedâ•.

What more can anyone say....
