In Fiscal Year 2001, initial funds were appropriated by Congress for the Corps of Engineers to assist the State of Texas in determining if existing water could be better allocated to support more balanced water use to meet future needs. This overall study effort was designated as the Texas Water Allocation Assessment, and a wide array of studies have been initiated under this authority. The studies initiated as of April 2003 include the following:

[Review of Regional Water Plans](#) [578 pages - 14.8meg PDF]

[System Assessment Wright Patman and Jim Chapman Reservoirs](#) [HTML Link]

[Review of Corps of Engineers Water Supply Authorities](#) [145 pages - 2.99meg PDF]

[Brush Management Study](#) [HTML Link]

Instream Flow Analysis – Sulphur Basin and Brazos Basin
