PUBLIC NOTICE

For Information Contact: Yvonne deReynier (206) 526-6140 Mark Helvey (562) 980-4000 NMFS-SEA-05-12 FOR IMMEDIATE RELEASE December 27, 2005

PACIFIC COAST GROUNDFISH FISHERY

Commercial Trip Limits for 2006 Proposed Rule for Management Measures in 2006 Lingcod Stock is Rebuilt

The National Marine Fisheries Service (NMFS) is providing commercial trip limits that will be effective at 0001 hours (local time) January 1, 2006. These commercial trip limits have not changed since being announced in the last public notice, dated November 30, 2005, and are provided as a courtesy only.

Additionally, NMFS is proposing a rule to implement revisions to the 2006 commercial and recreational groundfish fishery specifications and management measures, which are intended to be effective March 1, 2006. That rule is proposing changes to current groundfish management measures for March through December 2006. These changes were recommended by the Pacific Fishery Management Council (Pacific Council), in consultation with Pacific Coast Treaty Indian Tribes and the States of Washington, Oregon, and California, at its October 31-November 4, 2005, meeting in San Diego, CA. The changes being proposed include: (1) adjustments to the limited entry fixed gear and open access sablefish daily trip limit (DTL) fishery north of 36° N. lat., (2) adjustments to limited entry trawl cumulative limits for sablefish, thornyheads, Dover sole, other flatfish, petrale sole, arrowtooth flounder, slope rockfish, splitnose rockfish, and lingcod, (3) adjustments to limited entry fixed gear and open

access cumulative limits for shelf, shortbelly, and widow rockfish south of 34°27' N. lat. and minor nearshore and black rockfish between 42° N. lat. and 40°10' N. lat., (4) adjustments to the Rockfish Conservation Area (RCA) boundaries, (5) adjustments to Washington, Oregon and California's recreational groundfish fisheries, (6) establishment of limited entry trawl, limited entry fixed gear, and open access trip limits for Pacific cod and spiny dogfish, (7) adjustments to the tribal management measures for Pacific cod, spiny dogfish and thornyheads, and (8) clarification of the non-groundfish trawl RCA. NMFS also proposes to revise the 2006 darkblotched rockfish OY, at the request of the Pacific Council, and under the authority of the Magnuson-Stevens Fishery Conservation and Management Act.

Finally, NMFS announces that the coastwide lingcod stock is no longer considered overfished and is fully rebuilt. For a more detailed description of this proposed rule or information on how to comment on this proposed rule, see the notice published in the <u>Federal Register</u> on December 19, 2005. The proposed rule is also available on our website (<u>www.nwr.noaa.gov</u>) on the groundfish regulations page.

Visit the NMFS Northwest Region website for current groundfish management regulations, VMS information, and RCA boundary coordinates and maps.

- 1/ Bocaccio, chilipepper and cowcod are included in the trip limits for minor shelf rockfish.
- 2/ Splitnose rockfish is included in the trip limits for minor slope rockfish.
- 3/ "Other flatfish" are defined at § 660.302 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, sand sole, and starry flounder.
- 4/ The minimum size limit for lingcod is 24 inches (61 cm) total length.
- 5/ "Other fish" are defined at § 660.302 and include sharks, skates, ratfish, morids, grenadiers, and kelp greenling. Cabezon is included in the trip limits for "other fish."
- 6/ The Rockfish Conservation Area is a gear and/or sector specific closed area generally described by depth contours but specifically defined by lat/long coordinates set out at § 660.390.
- 7/ The "modified 200 fm" line is modified to exclude certain petrale sole areas from the RCA.
- 8/ If a vessel has both selective flatfish gear and large or small footrope gear on board during a cumulative limit period (either simultaneously or successively), the most restrictive cumulative limit for any gear on board during the cumulative limit period applies for the entire cumulative limit period.

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.
