FOR IMMEDIATE RELEASE

PACIFIC COAST GROUNDFISH FISHERY COMMERCIAL AND RECREATIONAL MANAGEMENT MEASURES FOR JANUARY THROUGH DECEMBER 2005 AND 2006

The National Marine Fisheries Service (NMFS) announces management measures for January through December 2005 and 2006 in the Pacific Coast groundfish fishery off Washington, Oregon, and California, effective at 0001 hours (local time) January 1, 2005 until modified, superceded or rescinded. These management measures were recommended by the Pacific Fishery Management Council (Council); the states of Washington, Oregon, and California will implement similar restrictions. Any discrepancies between this public notice and the *Federal Register* will be resolved in favor of the *Federal Register*.

Specifications and management measures for 2005-2006 are designed to rebuild overfished groundfish stocks and to achieve as much of the optimum yields (OYs) as practicable for non-overfished groundfish stocks. In order to protect overfished species, allowable harvest levels of healthy species will only be achieved where such harvest will not deter rebuilding of overfished and depleted stocks. Commercial management measures for 2005-2006 include landings limits, size limits, gear restrictions, and time/area closures. Recreational management measures include bag limits, size limits, gear restrictions, and time/area closures. For 2005 and 2006, the coastwide depth-based management program that NMFS introduced in 2003, which closes portions of the continental shelf to fishing for groundfish and to fishing for many non-groundfish species in fisheries that take groundfish incidentally, will be continued (see "Area Closures," "Commercial Fishery: Time and Area Closures" and the "Recreational Fishery" sections below). These closures are intended to protect and rebuild overfished groundfish species.

New for 2005 and 2006, selective flatfish trawl gear is defined as legal groundfish bottom trawl gear. This new trawl net design, which Oregon state tested in 2001-2004, features a headrope set back from a flattened net body to capture low-swimming flatfish while allowing rockfish, including canary rockfish, to escape over the upper edge of the trawl net. Continuing in 2005 and 2006, the

commercial groundfish fishery will be managed with separate landing limits for limited entry trawl vessels, limited entry fixed gear (longline and pot) vessels, and open access vessels. The open access fishery includes all groundfish gear except for pot or longline gear fished by a vessel that has a limited entry permit endorsed for that gear, or groundfish trawl. Although groundfish trawl is not legal gear in the open access fishery, groundfish may be taken by shrimp, prawn, California halibut, or sea cucumber trawl gear under certain conditions. These non-groundfish trawl gear are considered to be participating in the open access fishery, and have separate landing limits for some groundfish species from the rest of the open access fishery (see "Commercial Fishery: Non-groundfish Trawl Gear" below). Additionally, new recreational fisheries limits are introduced for 2005 and 2006 (see "Recreational Fisheries" below).

A vessel monitoring system (VMS) program to monitor vessel activities in and around closed areas continues to be required for all groundfish limited entry vessels in 2005 and 2006. For more information on the VMS requirements, visit our website at <http://www.nwr.noaa.gov/1sustfsh/groundfish/VMS/index.html> or call the contact names above. During 2005, NMFS and the Council are considering expanding coverage of the VMS program to both directed open access groundfish vessels and vessels in other target fisheries that incidentally take and retain groundfish in federal waters (seaward of 3 nm). VMS requirements for vessels that fish only in state waters are not currently being considered. The Council will consider VMS coverage for the open access fishery at their April 3-8, 2005 meeting in Tacoma, WA, after a series of NMFS-sponsored informational meetings are held along the west coast in early 2005.

Area Closures

Area closures, or groundfish conservation areas, include different types of closed areas: the rockfish conservation areas (RCAs), the yelloweye rockfish conservation area (YRCA), the cowcod conservation areas (CCAs), the Farallon Islands closure, and the Cordell Banks closure. These closed areas are intended to protect a particular groundfish species, species group or species complex. The closed areas that apply to the various fishery sectors are described in the code of federal regulations (CFR) at Title 50 CFR Part 660.381 through 660.384 (limited entry trawl, limited entry fixed gear, open access, and recreational fisheries, respectively) [*Note: CFR references may also be annotated as follows: § 660.381 through § 660.384*].

The RCAs, a depth-based management measure, continue to apply to all gears and sectors of the groundfish fishery, including the recreational sector. For the commercial fishery, there is both a trawl RCA and a non-trawl RCA depending on the gear type being used. Boundaries for the RCAs will be referred to as either the "eastern boundary," meaning the RCA boundary that is closest to shore, or the "western boundary," meaning the RCA boundary that is farthest offshore or seaward of the closed area. The RCA boundaries are generally defined by straight lines drawn between specific latitude and longitude coordinates that approximate depth contours. The coordinates approximating the RCA boundaries, effective for the various fishery sectors from January through December, are included at the end of this public notice and are available on our website at <http://www.nwr.noaa.gov/1sustfsh/groundfish/gConservAreas/> or by calling the contact names at the top of this public notice. These coordinates will be published in the *Federal Register* in late December 2004. All of these lines, except the 10 fm depth contour around the Farallon islands and the 20 fm depth contour in the CCAs in southern California, are specifically defined in the regulations at § 660.390

through § 660.394, using latitude/longitude coordinates.

The Yelloweye Rockfish Conservation Area (YRCA) is a C-shaped area off the northern Washington coast intended to protect yelloweye rockfish. The YRCA is defined by straight lines connecting the following specific latitude and longitude coordinates in the order listed:

48°18.00' N. lat.; 125°18.00' W. long.;
48°18.00' N. lat.; 124°59.00' W. long.;
48°11.00' N. lat.; 124°59.00' W. long.;
48°11.00' N. lat.; 125°11.00' W. long.;
48°04.00' N. lat.; 125°11.00' W. long.;
48°04.00' N. lat.; 124°59.00' W. long.;
48°00.00' N. lat.; 124°59.00' W. long.;
48°00.00' N. lat.; 125°18.00' W. long.;
and connecting back to 48°18.00' N. lat.; 125°18.00' W. long.

The Cowcod Conservation Areas (CCAs) are two mandatory closed areas off the southern California coast intended to protect cowcod and defined by coordinates that are fixed throughout the year.

(1) The Western CCA is an area south of Point Conception defined by the straight lines connecting the following specific latitude and longitude coordinates in the order listed:

33°50.00' N. lat., 119°30.00' W. long.;
33°50.00' N. lat., 118°50.00' W. long.;
32°20.00' N. lat., 118°50.00' W. long.;
32°20.00' N. lat., 119°37.00' W. long.;
33°00.00' N. lat., 119°37.00' W. long.;
33°00.00' N. lat., 119°53.00' W. long.;
33°33.00' N. lat., 119°53.00' W. long.;
33°33.00' N. lat., 119°30.00' W. long.;
and connecting back to 33°50.00' N. lat., 119°30.00' W. long.

(2) The Eastern CCA is an area west of San Diego defined by the straight lines connecting the following specific latitude and longitude coordinates in the order listed:

32°42.00' N. lat., 118°02.00' W. long.;
32°42.00' N. lat., 117°50.00' W. long.;
32°36.70' N. lat., 117°50.00' W. long.;
32°30.00' N. lat., 117°53.50' W. long.;
32°30.00' N. lat., 118°02.00' W. long.;
and connecting back to 32°42.00' N. lat., 118°02.00' W. long.

The Farallon Islands, off California's San Francisco and San Mateo Counties, include Southeast Farallon Island, Middle Farallon Island, North Farallon Island and Noon Day Rock. Generally, the State of California prohibits fishing for groundfish between the shoreline and the 10 fm depth contour around the Farallon Islands.

Cordell Banks are located offshore of California's Marin County. Generally, fishing for groundfish is prohibited inside the area around Cordell Banks enclosed by a line connecting specific latitude and longitude coordinates. The Cordell Banks closed area is defined by straight lines connecting the following specific latitude and longitude coordinates in the order listed:

38°03.18' N. lat., 123°20.77' W. long.;
38°06.29' N. lat., 123°25.03' W. long.;
38°06.34' N. lat., 123°29.32' W. long.;
38°04.57' N. lat., 123°31.30' W. long.;
38°02.32' N. lat., 123°31.07' W. long.;
38°00.00' N. lat., 123°28.40' W. long.;
37°58.10' N. lat., 123°26.66' W. long.;
37°55.07' N. lat., 123°26.81' W. long.;
and connecting back to 38°03.18' N. lat., 123°20.77' W. long.

Commercial Fishery

For complete regulations governing the commercial groundfish fishery, please see Title 50 CFR Part 660, Subpart G. For regulations specific to the limited entry trawl, limited entry fixed gear, open access fisheries, please see § 660.381 through § 660.383, respectively.

Trip Limit Tables

The trip limit tables for 2005 and 2006 are structured similarly to those in 2004. Each trip limit table (Limited Entry Trawl, Limited Entry Fixed Gear and Open Access) is separated into a North and South table. For instance, there is Table 3 (North) for limited entry trawl trip limits north of 40°10' N. lat. to the US/Canada border and Table 3 (South) for limited entry trawl trip limits south of 40°10' N. lat. to the US/Mexico border. At the top of each table, the depth-based management restrictions, or RCAs, for the appropriate gear type and area are included, however other closed areas may apply (See “Area Closures” above and “Commercial Fishery: Time and Area Closures” below). The trip limit tables included in this public notice are subject to change during the year. Any changes in the trip limits would be published in the *Federal Register* as an inseason action, and a public notice would be sent out to the fleet and posted on our website.

Time and Area Closures, including depth-based management

There are several closed times and areas described in the trip limit tables below. “Closure” when referring to closure of a fishery, means that taking and retaining, possessing, or landing that particular species or species group is prohibited. (See also § 660.302.) Offloading must begin before the time the fishery closes.

A header in the trip limit tables (Tables 3-5) generally describes the commercial RCAs that apply coastwide, but may not include all other closed areas.

- *Trawl RCAs*. The trawl RCAs are closed areas, defined by specific latitude and longitude coordinates designed to approximate specific depth contours, where fishing with limited entry trawl gear is prohibited. Coastwide, it is unlawful to take and retain, possess, or land any species of fish taken with trawl gear within the trawl RCA, except as permitted for vessels participating in the primary whiting season. Throughout the year, boundaries for the trawl RCA are provided in Table 3 (North) and Table 3 (South) and may be modified by NMFS inseason. Trawl RCA boundaries are defined by specific latitude and longitude coordinates which are provided at §§ 660.390 through 660.394. Trawl vessels may transit through the trawl RCA, with or without groundfish on board, provided all groundfish trawl

gear is stowed either: (1) below deck; or (2) if the gear cannot readily be moved, in a secured and covered manner, detached from all towing lines, so that it is rendered unusable for fishing; or (3) remaining on deck uncovered if the trawl doors are hung from their stanchions and the net is disconnected from the doors. These restrictions do not apply to vessels fishing with mid-water trawl gear for Pacific whiting or taking and retaining yellowtail rockfish or widow rockfish in association with Pacific whiting caught with mid-water trawl gear or to taking and retaining yellowtail or widow rockfish with mid-water trawl gear when trip limits are authorized for those species.

If a vessel fishes in the trawl RCA, it may not participate in any fishing on that trip that is prohibited by the restrictions that apply within the trawl RCA. [*For example, if a vessel participates in the pink shrimp fishery within the RCA, the vessel cannot on the same trip participate in the DTS fishery seaward of the RCA.*] Federal regulations do not supercede any state regulations that may prohibit trawling shoreward of the 3-nm state waters boundary line. Fishing with any open access trawl gear is prohibited within the trawl RCA coastwide, except as explained in this paragraph. Coastwide, it is unlawful to take and retain, possess, or land any species of fish taken with trawl gear within the trawl RCA, except as described in this paragraph for vessels participating in the pink shrimp and ridgeback prawn trawl fisheries.

Boundaries for the trawl RCA throughout the year in the open access fishery are provided in Table 5 (North) and Table 5 (South) and may be modified by NMFS inseason. Trawl RCA boundaries are defined by specific latitude and longitude coordinates which are specified below at §§ 660.390 through 660.394. The trawl rockfish conservation area (RCA) is closed coastwide to open access non-groundfish trawl fishing, except as follows: (A) Pink shrimp trawling is permitted in the trawl RCA and groundfish may be retained, and; (B) When the shoreward line of the trawl RCA is shallower than 100 fm, the ridgeback prawn trawl fishery south of 34°27.00' N. lat. may operate out to the 100 fm boundary line and may retain groundfish in this area (i.e., the shoreward boundary of the trawl RCA is at the 100 fm boundary line all year for the ridgeback prawn trawl fishery in this area).

- Non-trawl RCAs. Fishing for groundfish with non-trawl gear (limited entry or open access longline and pot or trap, open access hook-and-line, gillnet, set net, trammel net and spear) is prohibited within the non-trawl RCA, except that commercial fishing for “other flatfish” is permitted within the non-trawl RCA off California (between 42° N. lat. south to the U.S./Mexico border) using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to 2 lb (0.91 kg) of weight per line. It is unlawful to take and retain, possess, or land groundfish taken with non-trawl gear within the non-trawl RCA, unless otherwise authorized in this section. Limited entry fixed gear and open access vessels may transit through the non-trawl RCA, with or without groundfish on board. These restrictions do not apply to vessels fishing for species other than groundfish with non-trawl gear, although non-trawl vessels on a fishing trip for species other than groundfish that occurs within the non-trawl RCA may not retain any groundfish taken on that trip.

If a vessel fishes in the non-trawl RCA, it may not participate in any fishing on that trip that is prohibited by the restrictions that apply within the non-trawl RCA. [*For example, if a vessel participates in the salmon troll fishery within the RCA, the vessel cannot on the same trip participate in the sablefish fishery outside of the RCA.*] Retention of groundfish caught by salmon troll gear is prohibited in the designated RCAs, except that salmon trollers may retain yellowtail rockfish caught both within and shoreward and seaward the non-trawl RCA

subject to the limits in Tables 5 (North) and 5 (South). Boundaries for the non-trawl RCA throughout the year are provided in the header to Table 4 (North), Table 4 (South), Table 5 (North) and Table 5 (South) and may be modified by NMFS inseason. Non-trawl RCA boundaries are defined by specific latitude and longitude coordinates and are provided at §§ 660.390 through 660.394.

Off Washington's coast, the YRCA is designated as a voluntary closure for the limited entry fixed gear sablefish fleet and salmon trollers.

Off California's coast, commercial fishing is generally prohibited within the CCAs. However, commercial fishing with non-trawl gear for rockfish and lingcod is permitted shoreward of the 20-fm depth contour and fishing for "other flatfish" is permitted within the CCAs using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to 2 lb (0.91 kg) of weight per line. It is unlawful to take and retain, possess, or land groundfish within the CCAs, except for species stated in this section, when those waters are open to fishing. Commercial fishing vessels may transit through the Western CCA with their gear stowed and groundfish on board only in a corridor through the Western CCA bounded on the north by the latitude line at 33°00.50' N. lat., and bounded on the south by the latitude line at 32°59.50' N. lat.

Under California law, commercial fishing for all groundfish is prohibited between the shoreline and the 10 fm depth contour around the Farallon Islands, except that commercial fishing with non-trawl gear for "other flatfish" is permitted with non-trawl gear around the Farallon Islands using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to 2 lb (0.91 kg) of weight per line. (See § 660.390)

Also off California's coast, commercial fishing for groundfish is prohibited inside the area around Cordell Banks enclosed by a line connecting specific latitude and longitude coordinates listed at § 660.390 that approximate the 100 fm depth contour, except that commercial fishing with non-trawl gear for "other flatfish" is permitted around Cordell Banks using no more than 12 hooks, "Number 2" or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to 2 lb (0.91 kg) of weight per line. [Note: *California state regulations also prohibit fishing for all greenlings of the genus Hexagrammos, California sheephead and ocean whitefish in this area.*]

Minor Rockfish

Minor rockfish are those species without species-specific limits. Minor rockfish species are divided into three separate landing limit groups: nearshore, shelf, and slope. Black rockfish, bocaccio, canary rockfish, chilipepper rockfish, cowcod, shortbelly rockfish, widow rockfish, yelloweye rockfish, yellowtail rockfish, darkblotched rockfish, Pacific ocean perch (POP), and splitnose rockfish are not considered "minor" rockfish and must be sorted separately from other minor rockfish species and identified on fish tickets. The minor rockfish species in each species group are listed below. Species listed below are considered "minor" in the geographic area listed (north or south of 40°10' N. lat.).

Minor nearshore rockfish species:

- North of 40°10' N. lat.: black and yellow rockfish, blue rockfish, brown rockfish, calico rockfish, China rockfish, copper rockfish, gopher rockfish, grass rockfish, kelp rockfish, olive rockfish, quillback rockfish, treefish.
- South of 40°10' N. lat., nearshore rockfish are divided into three management categories:

- (1) Shallow nearshore rockfish consists of black and yellow rockfish, China rockfish, gopher rockfish, grass rockfish, kelp rockfish.
- (2) Deeper nearshore rockfish consists of black rockfish, blue rockfish, brown rockfish, rockfish, copper rockfish, olive rockfish, quillback rockfish, treefish.
- (3) California scorpionfish.

Minor shelf rockfish species:

- North of 40°10' N. lat.: bronzespotted rockfish, bocaccio, chameleon rockfish, chilipepper, cowcod, dusky rockfish, dwarf-red rockfish, flag rockfish, freckled rockfish, greenblotched rockfish, greenspotted rockfish, greenstriped rockfish, halfbanded rockfish, harlequin rockfish, honeycomb rockfish, Mexican rockfish, pink rockfish, pinkrose rockfish, pygmy rockfish, redstripe rockfish, rosethorn rockfish, rosy rockfish, silvergray rockfish, speckled rockfish, squarespot rockfish, starry rockfish, stripetail rockfish, swordspine rockfish, tiger rockfish, vermillion rockfish.
- South of 40°10' N. lat.: bronzespotted rockfish, chameleon rockfish, dusky rockfish, dwarf-red rockfish, flag rockfish, freckled rockfish, greenblotched rockfish, greenspotted rockfish, greenstriped rockfish, halfbanded rockfish, harlequin rockfish, honeycomb rockfish, Mexican rockfish, pink rockfish, pinkrose rockfish, pygmy rockfish, redstripe rockfish, rosethorn rockfish, rosy rockfish, silvergray rockfish, speckled rockfish, squarespot rockfish, starry rockfish, stripetail rockfish, swordspine rockfish, tiger rockfish, vermillion rockfish, yellowtail rockfish.

Minor slope rockfish species:

- North of 40°10' N. lat.: aurora rockfish, bank rockfish, blackgill rockfish, redbanded rockfish, rougheye rockfish, sharpchin rockfish, shorthraker rockfish, splitnose rockfish, yellowmouth rockfish.
- South of 40°10' N. lat.: aurora rockfish, bank rockfish, blackgill rockfish, Pacific ocean perch, redbanded rockfish, rougheye rockfish, sharpchin rockfish, shorthraker rockfish, yellowmouth rockfish.

Sorting Requirements

It is unlawful for any person to “fail to sort, prior to the first weighing after offloading, those groundfish species or species groups for which there is a trip limit, size limit, quota, harvest guideline, or OY, if the vessel fished or landed in an area during a time when such trip limit, size limit, OY, or quota applied.” The States of Washington, Oregon, and California may also require that vessels record their landings as sorted on their state fish tickets. This provision applies to both the limited entry and open access fisheries. The following species must be sorted in 2005 and 2006:

For vessels with a limited entry permit:

- *Coastwide* – widow rockfish, canary rockfish, darkblotched rockfish, yelloweye rockfish, shortbelly rockfish, black rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, shortspine and longspine thornyhead, Dover sole, arrowtooth flounder, rex sole, petrale sole, arrowtooth flounder, other flatfish, lingcod, sablefish, and Pacific whiting
- *North of 40°10' N. lat.* – POP, yellowtail rockfish, and, for fixed gear, blue rockfish;
- *South of 40°10' N. lat.* – minor shallow nearshore rockfish, minor deeper nearshore rockfish, California scorpionfish, chilipepper rockfish, bocaccio rockfish, splitnose rockfish, Pacific sanddabs, and cabezon.

For open access vessels (vessels without a limited entry permit):

- *Coastwide*—widow rockfish, canary rockfish, darkblotched rockfish, yelloweye rockfish, black rockfish, minor nearshore rockfish, minor shelf rockfish, minor slope rockfish, Dover sole, arrowtooth flounder, petrale sole, rex sole, other flatfish, lingcod, sablefish, Pacific whiting, and Pacific sanddabs;
- *North of 40°10' N. lat.*—blue rockfish, POP, yellowtail rockfish;
- *South of 40°10' N. lat.*—minor shallow nearshore rockfish, minor deeper nearshore rockfish, chilipepper rockfish, bocaccio rockfish, splitnose rockfish, and cabezon;
- *South of Point Conception, CA (34°27' N. lat.)*--thornyheads.

Fishing in areas with Different Landing Limits for the Same Species

Trip limits for a species or a species group may differ in different north-south management areas along the coast. The following “crossover” provisions apply to vessels operating in different geographical areas that have different cumulative or “per trip” trip limits for the same species or species group. Such crossover provisions do not apply to species that are subject only to daily trip limits, or to the trip limits for black rockfish off Washington (see § 660.371).

During the fishing year, NMFS may implement management measures for a species or species group that set different types of trip limits (*for example, per trip limits versus cumulative trip limits*) for different areas. If a vessel fishes for a species or species group that is managed with different types of trip limits in two different areas within the same cumulative limit period, then that vessel is subject to the most restrictive overall cumulative limit for that species, regardless of where fishing occurs.

If a vessel takes and retains any groundfish species or species group of groundfish in an area where a more restrictive trip limit applies, before fishing in an area where a more liberal trip limit (or no trip limit) applies, then that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed. If a vessel takes and retains a groundfish species or species group in an area where a higher trip limit (or no trip limit applies) and takes and retains, possess or lands the same species or species group in an area where a more restrictive trip limit applies, then that vessel is subject to the more restrictive trip limit for the entire period to which that trip limit applies, no matter where the fish are taken and retained, possessed, or landed.

Vessels operating in the limited entry trawl fishery are subject to these crossover provisions when making landings that include any one of the four species in the “DTS complex” or any of the species in the flatfish complex. (See limited entry trawl trip limit tables below.) There are several rockfish species (calico, California scorpionfish, bocaccio, chilipepper, cowcod, splitnose, yellowtail, and POP) that are part of a minor rockfish group in one management area, but which have species-specific limits in another management area. Landings of those species are included in the minor rockfish species group when those landings are made in the area where the species is considered a minor rockfish. A vessel that takes and retains fish from a minor rockfish complex (nearshore, shelf, or slope) on both sides of a management line during a single cumulative limit period is subject to the more restrictive cumulative limit for that minor rockfish complex during that period.

Limited Entry Trawl Gear

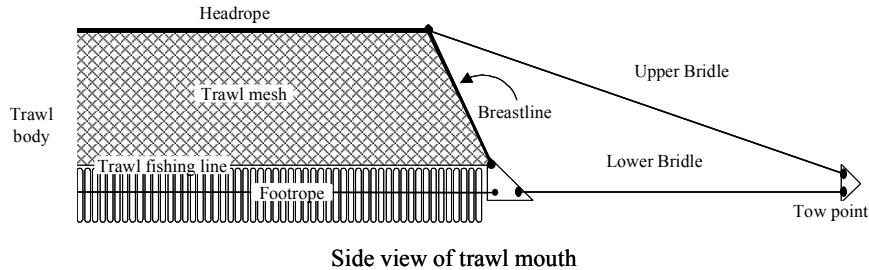

For more detailed regulations applying to the limited entry trawl fishery, see § 660.381 of the Pacific Coast groundfish regulations. The limited entry trawl trip limit tables below, Table 3 (North) and Table 3 (South), describe limits for four different types of limited entry trawl gear (large footrope gear, small footrope gear, selective flatfish trawl gear and midwater gear). Large footrope gear is bottom trawl gear with a footrope diameter larger than 8 inches (20 cm) (including rollers, bobbins or other material encircling or tied along the length of the footrope). Small footrope gear is bottom trawl gear with a footrope diameter of 8 inches (20 cm) or smaller (including rollers, bobbins or other material encircling or tied along the length of the footrope). Chafing gear may be used only on the last 50 meshes of a small footrope trawl, measured from the terminal (closed) end of the codend. Other lines or ropes that run parallel to the footrope may not be augmented such that they have a diameter larger than 8 inches (20 cm). For enforcement purposes, the footrope will be measured in a straight line from the outside edge to the opposite outside edge at the widest part on any individual part, including any individual disk, roller, bobbin, or any other device. Selective flatfish trawl gear is a type of small footrope trawl gear. The selective flatfish trawl net must be a two-seamed net and its breastline may not be longer than 3 ft (0.92 m) in length. There may be no floats along the center third of the selective flatfish trawl net's headrope and the headrope must be at least 30 percent longer in length than the footrope. Selective flatfish trawl gear may not have a footrope that is longer than 105 ft (32.26 m) in length. Midwater trawl gear must have unprotected footropes at the trawl mouth, and must not have rollers, bobbins, tires, wheels, rubber discs, or any similar device anywhere on any part of the net. The footrope of midwater gear may not be enlarged by encircling it

with chains or by any other means. Ropes or lines running parallel to the footrope of midwater trawl gear must be bare and may not be suspended with chains or any other materials. Sweep lines, including the bottom leg of the bridle, must be bare. For at least 20 ft (6.15 m) immediately behind the footrope or headrope, bare ropes or mesh of 16-inch (40.6-cm) minimum mesh size must completely encircle the net. A band of mesh (a "skirt") may encircle the net under transfer cables, lifting or splitting straps (chokers). However, the skirt must be over riblines and restraining straps, it must be the same mesh size or larger mesh size than the net to which it is attached, and it must be no wider than 16 meshes.

All trawl nets may be fished with or without otter boards, and may use warps or cables to herd fish. Only single-walled codends may be used in any trawl. Double-walled codends are prohibited.

Groundfish trawl gear must meet minimum mesh size requirements. Mesh size requirements apply throughout the net. Minimum trawl mesh sizes are: bottom trawl, 4.5 inches (11.4 cm); midwater trawl, 3.0 inches (7.6 cm). Minimum trawl mesh size requirements are met if a 20-gauge stainless steel wedge, less one thickness of the metal wedge, can be passed with only thumb pressure through at least 16 of 20 sets of two meshes each of wet mesh. Chafing gear may encircle no more than 50 percent of the net's circumference, except for small footrope gear. No section of chafing gear may be longer than 50 meshes of the net to which it is attached. Except at the corners, the terminal end of each section of

FIGURE 1 TO SUBPART G OF PART 660 – DIAGRAM OF SELECTIVE FLATFISH TRAWL

chafing gear must not be connected to the net. (The terminal end is the end farthest from the mouth of the net.) Chafing gear must be attached outside any riblines and restraining straps. There is no limit on the number of sections of chafing gear on a net.

It is unlawful for any vessel using large footrope gear to fish for groundfish shoreward of the trawl RCAs. The use of large footrope gear is permitted seaward of the trawl RCAs coastwide. The use of selective flatfish trawl gear is permitted seaward of the trawl RCA coastwide. Small footrope gear is permitted seaward of the RCA coastwide. North of 40°10' N. lat., it is unlawful for any vessel using small footrope gear (except selective flatfish gear) to fish for groundfish or have small footrope trawl gear (except selective flatfish gear) onboard while fishing shoreward of the trawl RCA. Selective flatfish gear is required shoreward of the trawl RCA north of 40°10' N. lat. Midwater trawl gear is permitted only for vessels participating in the primary Pacific whiting fishery (for details on the Pacific whiting fishery see § 660.373). South of 40°10' N. lat., small footrope gear is required shoreward of the RCA. Selective flatfish gear is permitted, but not required, shoreward of the trawl RCA. The use of midwater trawl gear is prohibited shoreward of the trawl RCA and permitted seaward of the trawl RCA.

A vessel that is trawling within a Groundfish Conservation Area (GCA), or closed area, with trawl gear authorized for use within a GCA may not have any other type of trawl gear on board, except that vessels participating in the Pacific whiting primary season may also have large footrope gear on board. It is legal to have more than one type of limited entry trawl gear on board for vessels fishing outside of the trawl RCA, but the most restrictive trip limit associated with the gear on board will apply for that trip, and will count toward the cumulative trip limit for that gear.

North of 40°10' N. lat.: If selective flatfish trawl gear is used by or is on board a vessel at any time north of 40°10' N. lat. (either shoreward or seaward of the trawl RCA) and those trip limits are the most restrictive for a species or species group during the entire cumulative limit period, then selective flatfish trawl limits apply to that vessel for that species or species group for that entire cumulative limit period, regardless of whether other gear types are also used during that period. Midwater trawl gear is allowed only for vessels participating in the primary whiting season. On non-whiting trips (defined as any fishing trip that takes, retains, possess, or lands less than 10,000 lb (4,536 kg) of whiting), vessels with both large footrope and midwater trawl gear on board during a trip may access the large footrope limits while fishing with large footrope gear seaward of the trawl RCA.

South of 40°10' N. lat.: If a vessel has small footrope trawl gear on board, then it may not have any other trawl gear on board. For vessels using more than one type of trawl gear during a cumulative limit period, limits are additive up to the largest limit for the type of gear used during that period. (*Example: If a vessel harvests 300 lb (136 kg) of chilipepper rockfish with small footrope gear, it may harvest up to 11,700 lb (5,209 kg) of chilipepper rockfish with large footrope gear during July and August.*) If a vessel fishes north of 40°10' N. lat. with either selective flatfish or small footrope gear onboard the vessel at any time during the cumulative limit period, the most restrictive trip limit associated with the gear on board applies for that trip and will count toward the cumulative trip limit for that gear.

Limited Entry Fixed Gear

For more detailed regulations applying to the limited entry fixed gear fishery, see § 660.382 of the Pacific Coast groundfish regulations. The limited entry fixed gear trip limit tables are listed below, Table 4 (North) and Table 4 (South). The following types of fishing gear are authorized in the limited entry fixed gear fishery: longline and pot or trap. Vessels participating in the limited entry fixed gear

fishery may also fish with open access gear subject to the gear restrictions at § 660.383(b), but will be subject to the most restrictive trip limits for the gear used. The trip limit for black rockfish caught with hook-and-line gear also applies, see "Black Rockfish" below or § 660.371 of the regulations.

Limited Entry Fixed Gear Primary Sablefish Fishery

For more detailed regulations applying to the limited entry fixed gear primary sablefish fishery, see § 660.372 of the Pacific Coast groundfish regulations. The limited entry fixed gear primary sablefish fishery occurs north of 36° N. lat. The primary sablefish season for limited entry, fixed gear vessels begins at 12 noon l.t. on April 1 and ends at 12 noon l.t. on October 31. If a vessel is registered for use with a sablefish-endorsed limited entry permit, all sablefish taken after April 1 count against the cumulative limits associated with the permit(s) registered for use with that vessel.

A vessel participating in the primary season will be constrained by the sablefish cumulative limit associated with each of the permits registered for use with that vessel. During the primary season, each vessel authorized to participate in that season may take, retain, possess, and land sablefish, up to the cumulative limits for each of the permits registered for use with that vessel. If multiple limited entry permits with sablefish endorsements are registered for use with a single vessel, that vessel may land up to the total of all cumulative limits announced in the Federal Register for the tiers for those permits. Up to 3 permits may be registered for use with a single vessel during the primary season; thus, a single vessel may not take and retain, possess or land more than 3 primary season sablefish cumulative limits in any one year. A vessel registered for use with multiple limited entry permits is subject to per vessel limits for species other than sablefish, and to per vessel limits when participating in the daily trip limit fishery for sablefish. For 2005, the following limits are in effect: **Tier 1 at 64,100 lb, Tier 2 at 29,100 lb, and Tier 3 at 16,600 lb.** For 2006, the following limits are in effect: **Tier 1 at 62,700 lb, Tier 2 at 28,500 lb, and Tier 3 at 16,300 lb.**

A vessel that is eligible to participate in the primary sablefish season may participate in the daily trip limit fishery for sablefish once that vessel's primary season sablefish limit(s) have been taken, or after October 31, 2004, whichever occurs first. No vessel may land sablefish against both its primary season cumulative sablefish limits and against the daily trip limit fishery limits within the same 24 hour period of 0001 hour l.t. to 2400 hours l.t. If a vessel has taken all of its tier limit except for an amount that is smaller than the daily trip limit amount, that vessel's subsequent sablefish landings are automatically subject to daily and/or weekly trip limits.

Sablefish Daily Trip Limit Fishery

Vessels registered for use with a limited entry, fixed gear permit that does not have a sablefish endorsement may participate in the limited entry, daily and/or weekly trip limit fishery for as long as that fishery is open during the year. Daily and/or weekly trip limits for the limited entry fishery north and south of 36° N. lat. are provided in Tables 4 (North) and 4 (South). A vessel landing sablefish under the daily limit may take multiple daily limits within the same week as long as the cumulative monthly or two-month landings limit for sablefish is not exceeded. [For example, if the limits read, "300 lb/day, or 1 landing per week of up to 900 lb, not to exceed 3,600 lb/2 months" and a vessel fishing with nontrawl gear were to land 300 lb of sablefish on a Sunday, and then land 400 lb of sablefish on the Monday of the same week, then 100 lb of the second landing would be deemed an unlawful landing in excess of a 300 lb daily limit; the vessel would be prohibited from landing any more sablefish during the rest of that week.] A vessel landing sablefish under the weekly limit may make only one landing of sablefish per week (Sunday through Saturday) and may not exceed the monthly or two-month landings

limit for sablefish. If a vessel makes a landing in excess of the daily trip limit, then that vessel is considered to be participating in the fishery under the weekly limit and is subject to the constraints of the weekly limit fishery. [For example, if a vessel fishing with nontrawl gear were to land 400 lb of sablefish on a Sunday, that vessel would have exceeded a daily limit of 300 lb and not be eligible to land any further sablefish that week even though that vessel had not achieved the full weekly limit.]

Open Access Fisheries

For more detailed regulations applying to the open access fisheries, see § 660.383 of the Pacific Coast groundfish regulations. The open access trip limit tables are listed below, Table 5 (North) and Table 5 (South), which includes trip limits and RCAs for open access non-trawl gear and non-groundfish trawl gear. Open access gear is gear used to take and retain groundfish from a vessel that does not have a valid permit for the Pacific Coast groundfish fishery with an endorsement for the gear used to harvest the groundfish and must be one of the following gears: longline, trap, pot, hook-and-line (fixed or mobile), setnet (anchored gillnet or trammel net, which are permissible south of 38° N. lat. only), spear and non-groundfish trawl gear (trawls used to target non-groundfish species: pink shrimp or ridgeback prawns, and, south of Pt. Arena, CA (38°57.50' N. lat.), California halibut or sea cucumbers).

Open Access Non-groundfish Trawl Gear

The trip limits for groundfish taken incidentally with exempted trawl gear by vessels engaged in fishing for pink shrimp, ridgeback prawns, California halibut, or sea cucumbers are included at the bottom of the open access trip limit tables, Table 5 (North) and Table 5 (South) (see below). In addition to the groundfish trip limits for non-groundfish trawl fisheries at the bottom of the open access tables, the other trip limits in the open access tables also apply. A vessel that takes and retains pink shrimp and also takes and retains groundfish in either the limited entry or open access fishery during the same applicable cumulative limit period that it takes and retains pink shrimp (which may be 1 month or 2 months, depending on the fishery and the time of year), may retain the larger of the 2 limits, but only if the limit(s) for each gear or fishery are not exceeded when operating in that fishery or with that gear. The limits are not additive; the vessel may not retain a separate trip limit for each fishery.

Open Access Non-Trawl Gear

The trip limit for black rockfish caught with hook-and-line gear also applies, see “Black Rockfish” below or § 660.371 of the regulations. Open access vessels may participate in the open access, daily trip limit sablefish fishery for as long as that fishery is open during the year. Daily and/or weekly trip limits for the open access fishery north and south of 36° N. lat. are provided in Tables 5 (North) and 5 (South). A vessel landing sablefish under the daily limit may take multiple daily limits within the same week as long as the cumulative monthly or two-month landings limit for sablefish is not exceeded. [For example, if the limits read, “300-lb/day, or 1 landing per week of up to 900 lb, not to exceed 3,600 lb/2 months” and a vessel fishing with nontrawl gear were to land 300 lb of sablefish on a Sunday, and then land 400 lb of sablefish on the Monday of the same week, then 100 lb of the second landing would be deemed an unlawful landing in excess of a 300-lb daily limit; the vessel would be prohibited from landing any more sablefish during the rest of that week.] A vessel landing sablefish under the weekly limit may make only one landing of sablefish per week (Sunday through Saturday) and may not exceed the monthly or two-month landings limit for sablefish. If a vessel makes a landing in excess of the daily trip limit, then that vessel is considered to be participating in the fishery under the weekly limit and is subject to the constraints of the weekly limit fishery. [For example, if a vessel fishing with nontrawl gear were to land 400 lb of sablefish on a Sunday, that vessel would have exceeded a daily limit of 300 lb and not be eligible to land any further sablefish that week even though that vessel had not achieved

the full weekly limit.]

Black Rockfish

The trip limit for black rockfish for commercial fishing vessels using hook-and-line gear between the U.S.-Canada border and Cape Alava (48°09.50' N. lat.), and between Destruction Island (47°40' N. lat.) and Leadbetter Point (46°38.17' N. lat.), is 100 lb or 30 percent, by weight of all fish on board, whichever is greater, per vessel per fishing trip. These per trip limits apply to limited entry and open access fisheries, in conjunction with the cumulative trip limits and other management measures in §§ 660.382 and 660.383. The crossover provisions do not apply to the black rockfish per-trip limits.

1/ "Other flatfish" are defined at § 660.302 and include butter sole, curlfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, sand sole, and starry flounder.

2/ POP is included in the trip limits for minor slope rockfish. Yellowtail is included in the trip limits for minor shelf rockfish.

3/ The minimum size limit for lingcod is 24 inches (61 cm) total length.

4/ "Other fish" are defined at § 660.302 and include sharks, skates, ratfish, morids, grenadiers, and kelp greenling.
Pacific cod is included in the trip limits for "other fish."

5/ The Rockfish Conservation Area is a gear and/or sector specific closed area generally described by depth contours but specifically defined by lat/long coordinates set out at § 660.390.

18 North	Effective April 1 - October 31: groundfish 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.										
19 SALMON TROLL											
20 North	Salmon trollers may retain and land up to 1 lb of yellowtail rockfish for every 2 lbs of salmon landed, with a cumulative limit of 200 lb/month, both within and outside of the RCA. This limit is within the 200 lb per month combined limit for minor shelf rockfish, widow rockfish and yellowtail rockfish, and not in addition to that limit. All groundfish species are subject to the open access limits, seasons and RCA restrictions listed in the table above.										

1/ Bocaccio, chilipepper and cowcod rockfishes are included in the trip limits for minor shelf rockfish.

Splitnose rockfish is included in the trip limits for minor slope rockfish.

2/ "Other flatfish" are defined at § 660.302 and include butter sole, curfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, sand sole, and starry flounder.

3/ For black rockfish north of Cape Alava (48°09'.50" N. lat.), and between Destruction Is. (47°40' N. lat.) and Leadbetter Pnt. (46°38'.17" N. lat.), there is an additional limit of 100 lbs or 30 percent by weight of all fish on board, whichever is greater, per vessel, per fishing trip.

4/ The size limit for lingcod is 24 inches (61 cm) total length.

5/ "Other fish" are defined at § 660.302 and include sharks, skates, ratfish, morids, grenadiers, and kelp greenling.

Cabezon is included in the trip limits for "other fish."

45		Groundfish 300 lb/trip. Trip limits in this table also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38°57'30" N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, starry flounder, rock sole, curfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 31).			

1/ Yellowtail rockfish is included in the trip limits for minor shelf rockfish and POP is included in the trip limits for minor slope rockfish.

2/ "Other flatfish" are defined at § 660.302 and include butter sole, curfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, sand sole, and starry flounder.

3/ The size limit for lingcod is 24 inches (61 cm) total length.

4/ "Other fish" are defined at § 660.302 and include sharks, skates, ratfish, morids, grenadiers, and kelp greenling. Pacific cod is included in the trip limits for "other fish."

5/ The Rockfish Conservation Area is a gear and/or sector specific closed area generally described by depth contours but specifically defined by lat/long coordinates set out at § 660.390.

6/ The "modified 200 fm" line is modified to exclude certain petrale sole areas from the RCA.
To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

Recreational Fishery

Federal recreational groundfish regulations are not intended to supersede any more restrictive state recreational groundfish regulations relating to federally-managed groundfish. The bag limits include fish taken in both state and Federal waters. The only types of fishing gear authorized for recreational fishing are hook-and-line and spear. Off the coast of Washington, Oregon, and California, boat limits apply, whereby each fisher aboard a vessel may continue to use angling gear until the combined daily limits of groundfish for all licensed and juvenile anglers aboard has been attained (additional state restrictions on boat limits may apply). A guide to the recreational fishery closed areas for the year is at the end of this “Recreational Fishery” section.

Washington Recreational Regulations

For each person engaged in recreational fishing seaward of Washington, the groundfish bag limit is 15 groundfish per day, including rockfish and lingcod, and is open year-round (except for lingcod). The following sublimits and closed areas apply:

Recreational Groundfish Conservation Areas off Washington.

- *Yelloweye Rockfish Conservation Area (YRCA).* Recreational fishing for groundfish and halibut is prohibited within the YRCA. It is unlawful for recreational fishing vessels to take, retain, possess, or land groundfish within the YRCA. The YRCA is defined by latitude and longitude coordinates specified above under “Area Closures” and at § 660.390 in the regulations.
- *Recreational RCA.* Fishing for groundfish with recreational gear is prohibited within the recreational RCA. It is unlawful to take and retain, possess, or land groundfish taken with recreational gear within the recreational RCA. A vessel fishing in the recreational RCA may not be in possession of any groundfish. [*For example, if a vessel participates in the recreational salmon fishery within the RCA, the vessel cannot be in possession of groundfish while in the RCA. The vessel may, however, on the same trip fish for and retain groundfish shoreward of the RCA on the return trip to port.*] Off Washington, if recreational fishing for all groundfish is prohibited seaward of a boundary line approximating the 30-fm depth contour, a document will be published in the Federal Register inseason. Coordinates for the boundary line approximating the 30-fm depth contour are listed below and in § 660.391 of the regulations.

Rockfish. In areas seaward of Washington that are open to recreational groundfish fishing, there is a 10 rockfish per day bag limit. Taking and retaining canary rockfish and yelloweye rockfish is prohibited.

Lingcod. For 2005, the lingcod season will be open from March 12 through October 15. For 2006, the lingcod season will be open from March 18 through October 14. In areas seaward of Washington that are open to recreational groundfish fishing and when the recreational season for lingcod is open, there is a bag limit of 2 lingcod per day, which may be no smaller than 24 in total length.

Oregon Recreational Regulations

Recreational Groundfish Conservation Areas off Oregon. Fishing for groundfish with recreational gear is prohibited within the recreational RCA, a type of closed area or GCA. It is unlawful to take and retain, possess, or land groundfish taken with recreational gear within the recreational RCA. A vessel fishing in the recreational RCA may not be in possession of any groundfish. [For example, if a vessel participates in the recreational salmon fishery within the RCA, the vessel cannot be in possession of groundfish while in the RCA. The vessel may, however, on the same trip fish for and retain groundfish shoreward of the RCA on the return trip to port.] Off Oregon, from June 1 through September 30, recreational fishing for groundfish is prohibited seaward of a recreational RCA boundary line approximating the 40 fm depth contour. Coordinates for the boundary line approximating the 40 fm depth contour are listed below and at § 660.391 in the regulations. Recreational fishing for all groundfish may be prohibited inseason seaward of the 20 fm depth contour or a boundary line approximating the 30 fm depth contour. If the closure seaward of the 20 fm depth contour or a boundary line approximating the 30 fm depth contour is implemented inseason, a document will be published in the Federal Register. Coordinates for the boundary line approximating the 30 fm depth contour are listed below and at § 660.391 in the regulations.

Seasons. Recreational fishing for groundfish is open from January 1 through December 31, subject to the closed areas described above.

Bag Limits, Size Limits. The bag limits for each person engaged in recreational fishing seaward of Oregon are 2 lingcod per day, which may be no smaller than 24 in total length; and 10 marine fish per day, which excludes Pacific halibut, salmon, tuna, perch species, sturgeon, sanddabs, lingcod, striped bass and baitfish (herring, smelt, anchovies and sardines), but which includes rockfish, greenling, cabezon and other groundfish species. The minimum size limit for cabezon retained in the recreational fishery is 16 in and for greenling is 10 in. Taking and retaining canary rockfish and yelloweye rockfish is prohibited.

California Recreational Regulations

Seaward of California, California law provides that, in times and areas when the recreational fishery is open, there is a 20-fish bag limit for all species of finfish, within which no more than 10 fish of any one species may be taken or possessed by any one person. [Note: There are some exceptions to this rule. The following groundfish species are not subject to a bag limit: petrale sole, Pacific sanddab and starry flounder.] California state law may provide regulations similar to Federal regulations for the following state-managed species: ocean whitefish, California sheephead, and all greenlings of the genus Hexagrammos. Kelp greenling is the only federally-managed greenling. Retention of cowcod, yelloweye rockfish, and canary rockfish is prohibited in the recreational fishery seaward of California all year in all areas. For each person engaged in recreational fishing seaward of California, the following closed areas, seasons, bag limits, and size limits apply:

Recreational Groundfish Conservation Areas off California.

- **Recreational RCAs.** The recreational RCAs are areas that are closed to recreational fishing for groundfish. Fishing for groundfish with recreational gear is prohibited within the recreational RCA, except that recreational fishing for “other flatfish” is permitted within the recreational RCA as specified in the paragraph on “other flatfish” below. It is unlawful to

take and retain, possess, or land groundfish taken with recreational gear within the recreational RCA, unless otherwise described in this section. A vessel fishing in the recreational RCA may not be in possession of any species prohibited by the restrictions that apply within the recreational RCA. [For example, if a vessel participates in the recreational salmon fishery within the RCA, the vessel cannot be in possession of rockfish while in the RCA. The vessel may, however, on the same trip fish for and retain rockfish shoreward of the RCA on the return trip to port.]

Between 42° N. lat. (California/Oregon border) and 40°10.00' N. lat., recreational fishing for all groundfish (except “other flatfish”) is prohibited seaward of a boundary line approximating the 40 fm depth contour along the mainland coast and along islands and offshore seamounts from July 1 through October 31; and is closed entirely from January 1 through June 30 and from November 1 through December 31 (i.e., prohibited seaward of the shoreline). Recreational fishing for all groundfish may be prohibited inseason seaward of a boundary line approximating the 30 fm depth contour. If a closure seaward of the boundary line approximating the 30 fm (depth contour is implemented inseason, a document will be published in the Federal Register. Coordinates for the boundary line approximating the 30 fm and 40 fm depth contours are specified below and in § 660.391 of the regulations.

Between 40°10.00' N. lat. and 36°N. lat., recreational fishing for all groundfish (except “other flatfish”) is prohibited seaward of the 20 fm depth contour along the mainland coast and along islands and offshore seamounts from July 1 through November 30; and is closed entirely from January 1 through June 30 and from December 1 through December 31 (i.e., prohibited seaward of the shoreline). Closures around the Farallon Islands and Cordell Banks also apply in this area, see “Area Closures” above.

Between 36° N. lat. and 34°27.00' N. lat., recreational fishing for all groundfish (except “other flatfish”) is prohibited shoreward of the 20 fm depth contour and seaward of a boundary line approximating the 40-fm depth contour along the mainland coast and along islands and offshore seamounts from May 1 through September 30 (i.e., fishing is permitted only between 20 fm and 40 fm); and is closed entirely from January 1 through April 30 and from October 1 through December 31 (i.e., prohibited seaward of the shoreline). Coordinates for the boundary line approximating the 40-fm depth contour are specified below and in § 660.391 of the regulations.

South of 34°27.00' N. lat., recreational fishing for all groundfish (except California scorpionfish as specified below in this paragraph and in the paragraph on “other flatfish”) is prohibited shoreward of a boundary line approximating the 30 fm depth contour and seaward of a boundary line approximating the 60-fm depth contour along the mainland coast and along islands and offshore seamounts from March 1 through June 30; and is prohibited seaward of a boundary line approximating the 40-fm depth contour from July 1 through September 30; except in the CCAs where fishing is prohibited seaward of the 20-fm depth contour when the fishing season is open. Recreational fishing for all groundfish (except California scorpionfish and “other flatfish”) is closed entirely from January 1 through February 29 and from October 1 through December 31 (i.e., prohibited seaward of the shoreline). Recreational fishing for California scorpionfish south of 34°27.00' N. lat. is prohibited seaward of a boundary line approximating the 40-fm depth contour from October 1 through November 30, and seaward of the 20-fm depth contour from December 1 through December 31, except in the CCAs where fishing is prohibited seaward of the 20-fm depth contour when the fishing season is open. Recreational fishing for California scorpionfish south of 34°27.00' N. lat. is closed entirely from January 1 through September 30 (i.e.,

prohibited seaward of the shoreline). Coordinates for the boundary line approximating the 30 fm, 40 fm, and 60-fm depth contours are specified below and in §§ 660.391 and 660.392 of the regulations.

- Cowcod Conservation Areas (CCAs). The latitude and longitude coordinates of the CCA boundaries are specified above in “Area Closures” and at § 660.390 in the regulations. In general, recreational fishing for all groundfish is prohibited within the CCAs, except that fishing for “other flatfish” is permitted within the CCAs. However, recreational fishing for the following species is permitted shoreward of the 20-fm depth contour: minor nearshore rockfish, cabezon, kelp greenling, lingcod, California scorpionfish, and “other flatfish” (subject to gear requirements in the “other flatfish” paragraph below). [NOTE: *California state regulations also permit recreational fishing for all greenlings of the genus Hexagrammos shoreward of the 20-fm depth contour in the CCAs.*] It is unlawful to take and retain, possess, or land groundfish within the CCAs, except for species authorized in this section.
- Farallon Islands. Under California state law, recreational fishing for groundfish is prohibited between the shoreline and the 10-fm depth contour around the Farallon Islands, except that recreational fishing for “other flatfish” is permitted around the Farallon Islands. (Note: *California state regulations also prohibit the retention of other greenlings of the genus Hexagrammos, California sheephead and ocean whitefish.*) For a definition of the Farallon Islands, see “Area Closures” above or § 660.390 of the regulations.
- Cordell Banks. Recreational fishing for groundfish is prohibited inside the area around Cordell Banks enclosed by a line connecting specific latitude and longitude coordinates listed above in “Area Closures” and at § 660.390 that approximate the 100 fm depth contour, except that recreational fishing for “other flatfish” is permitted around Cordell Banks. [Note: *California state regulations also prohibit fishing for all greenlings of the genus Hexagrammos, California sheephead and ocean whitefish.*]]

RCG Complex. The California rockfish, cabezon, greenling complex (RCG Complex), as defined in state regulations (Section 1.91, Title 14, California Code of Regulations), includes all rockfish, kelp greenling, rock greenling, and cabezon. This category does not include California scorpionfish, also known as “sculpin.”

Seasons. When recreational fishing for the RCG Complex is open, it is permitted only outside of the recreational RCAs.

- North of 40°10.00' N. lat., recreational fishing for the RCG Complex is open from July 1 through October 31.
- Between 40°10.00' N. lat. and 36° N. lat., recreational fishing for the RCG Complex is open from July 1 through November 30 (i.e., it's closed from January 1 through June 30 and from December 1 through December 31).
- Between 36° N. lat. and 34°27.00' N. lat., recreational fishing for the RCG Complex is open from May 1 through September 30 (i.e., it's closed from January 1 through April 30 and from October 1 through December 31).
- South of 34°27.00' N. lat., recreational fishing for the RCG Complex is open from March 1 through September 30 (i.e., it's closed from January 1 through February 29 and from October 1 through December 31).

Bag limits, hook limits. In times and areas when the recreational season for the RCG Complex is open, there is a limit of 2 hooks and 1 line when fishing for rockfish. The bag limit is 10 RCG Complex fish per day coastwide. Retention of canary rockfish, yelloweye rockfish and cowcod

is prohibited. North of 40°10' N. lat., within the 10 RCG Complex fish per day limit, no more than 2 may be bocaccio, no more than 2 may be greenling (kelp and/or other greenlings) and no more than 3 may be cabezon. South of 40°10' N. lat., within the 10 RCG Complex fish per day limit, no more than 1 may be bocaccio, no more than 2 may be greenling (kelp and/or other greenlings) and no more than 3 may be cabezon. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. The following size limits apply: bocaccio may be no smaller than 10 in. total length; cabezon may be no smaller than 15 in. total length; and kelp and other greenling may be no smaller than 12 in. total length.

Dressing/Fileting. Cabezon, kelp greenling, and rock greenling taken in the recreational fishery may not be fileted at sea. Rockfish skin may not be removed when fileting or otherwise dressing rockfish taken in the recreational fishery. The following rockfish filet size limits apply: bocaccio filets may be no smaller than 5 in. and brown-skinned rockfish fillets may be no smaller than 6.5 in. “Brown-skinned” rockfish include the following species: brown, calico, copper, gopher, kelp, olive, speckled, squarespot, and yellowtail.

Lingcod.

Seasons. When recreational fishing for lingcod is open, it is permitted only outside of the recreational RCAs.

- North of 40°10.00' N. lat., recreational fishing for lingcod is open from July 1 through October 31.
- Between 40°10.00' N. lat. and 36° N. lat., recreational fishing for lingcod is open from July 1 through November 30 (i.e., it's closed from January 1 through June 30 and from December 1 through December 31).
- Between 36° N. lat. and 34°27.00' N. lat., recreational fishing for lingcod is open from May 1 through September 30 (i.e., it's closed from January 1 through April 30 and from October 1 through December 31).
- South of 34°27.00' N. lat., recreational fishing for lingcod is open from March 1 through September 30 (i.e., it's closed from January 1 through February 29 and from October 1 through December 31).

Bag limits, hook limits. In times and areas when the recreational season for lingcod is open, there is a limit of 2 hooks and 1 line when fishing for lingcod. The bag limit is 2 lingcod per day. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. Lingcod may be no smaller than 24 in. total length.

Dressing/Fileting. Lingcod filets may be no smaller than 16 in. in length.

“Other flatfish”. Coastwide off California, recreational fishing for “other flatfish” is permitted both shoreward of and within the closed areas. Recreational fishing for “other flatfish” is permitted within the closed areas, subject to a limit of up to 12 hooks, “Number 2” or smaller, which measure no more than 11 mm (0.44 inches) point to shank, and up to 2 lb (0.91 kg) of weight per line. “Other flatfish,” except Pacific sanddab and starry flounder, are subject to the overall 20-fish bag limit for all species of finfish, of which there may be no more than 10 fish of any one species. There is no season restriction or size limit for “other flatfish;” however, it is prohibited to filet “other flatfish” at sea.

California scorpionfish. California scorpionfish only occur south of 40°10.00' N. lat.

Seasons. When recreational fishing for California scorpionfish is open, it is permitted only outside of the recreational RCAs.

- Between 40°10.00' N. lat. and 36° N. lat., recreational fishing for California scorpionfish is open from July 1 through November 30 (i.e., it's closed from January 1 through June 30 and from December 1 through December 31).
- Between 36° N. lat. and 34°27.00' N. lat., recreational fishing for California scorpionfish is open from May 1 through September 30 (i.e., it's closed from January 1 through April 30 and from October 1 through December 31).
- South of 34°27.00' N. lat., recreational fishing for California scorpionfish is open from October 1 through December 31 (i.e., it's closed from January 1 through September 30).

Bag limits, hook limits. South of 40°10.00' N. lat., in times and areas where the recreational season for California scorpionfish is open, the bag limit is 5 California scorpionfish per day. California scorpionfish do not count against the 10 RCG Complex fish per day limit. Multi-day limits are authorized by a valid permit issued by California and must not exceed the daily limit multiplied by the number of days in the fishing trip.

Size limits. California scorpionfish may be no smaller than 10 in. total length.

Dressing/Fileting. California scorpionfish filets may be no smaller than 5 in. and must bear an intact 1 in. square patch of skin.

but specifically defined by lat/long coordinates set out at §§ 660.390 - 660.394.

EEZ= seaward boundary of the exclusive economic zone (i.e., 200 nm)

Additional Information

- A trip limit is the total allowable amount of a groundfish species or species complex, by weight, or by percentage of fish on board, that may be taken and retained, possessed, or landed per vessel from a single fishing trip. A daily trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in 24 consecutive hours, starting at 0001 hours (local time). A weekly trip limit is the maximum amount of a groundfish species or species group that may be taken and retained, possessed, or landed per vessel in 7 consecutive days, starting at 0001 hours l.t. on Sunday and ending at 2400 hours l.t. on Saturday. Weekly trip limits may not be accumulated during multiple week trips. If a calendar week falls within two different months or two different cumulative limit periods, a vessel is not entitled to two separate weekly limits during that week. A cumulative trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in a specific period of time, without a limit on the number of landing or trips.
- All limits are coastwide unless otherwise specified and in round weight or round weight equivalents. Percentages apply only to the round weight of legal fish on board unless otherwise specified.
- One metric ton is 2,204.6 lbs.
- For the purposes of the above limits, the following conversions apply. Sablefish: processed weight will be converted to round weight using the States' conversion factor of 1.6. Lingcod: 24 inches total length is equivalent to 19.5 inches headed, processed weight will be converted to round weight using 1.5 for headed-and-gutted lingcod, and 1.1 for gutted lingcod with the head on. To convert the round weight trip limit to its dressed weight equivalent, divide the round weight by the conversion factor. *For example, a 300 lb sablefish trip limit divided by 1.6 equals 187.5 lb dressed weight.*

Guide to Groundfish Conservation Areas (GCAs)

Effective January 1 - February 28, 2005

GCA boundaries lines for the remainder of the year are found in the header to Tables 3-5 in the "Commercial Fishery" section and in the table at the end of the "Recreational Fishery" section

Rockfish Conservation Areas (RCAs) are defined by a series of latitude and longitude coordinates that, when connected, form boundary lines approximating depth contours. RCAs may change seasonally.

Trawl Rockfish Conservation Area

Area of the Coast	Western Boundary	Eastern Boundary
U.S./Canada border - 38°00' N. lat.	Approximates the 200 fm depth contour (modified to allow fishing in petrale sole areas)	Approximates the 75 fm depth contour
38°00' N. lat. - 34°27' N. lat.	Approximates the 150 fm depth contour	
34°27' N. lat. - U.S./Mexico border	Approximates the 150 fm depth contour along the mainland coast and around islands	Approximates the 75 fm depth contour along the mainland coast shoreline around islands

Non-Groundfish Trawl RCA for CA halibut and Sea Cucumber (south of 38°57.50' N. lat.)

Boundaries for this RCA are the same as those shown above.

Non-Groundfish Trawl RCA for Ridgeback Prawn
