Net-Centric Enterprise Services (NCES) Forecast to Industry

Ms. Rebecca S. Harris
Director, PEO GIG Enterprise Services
8 August 2008

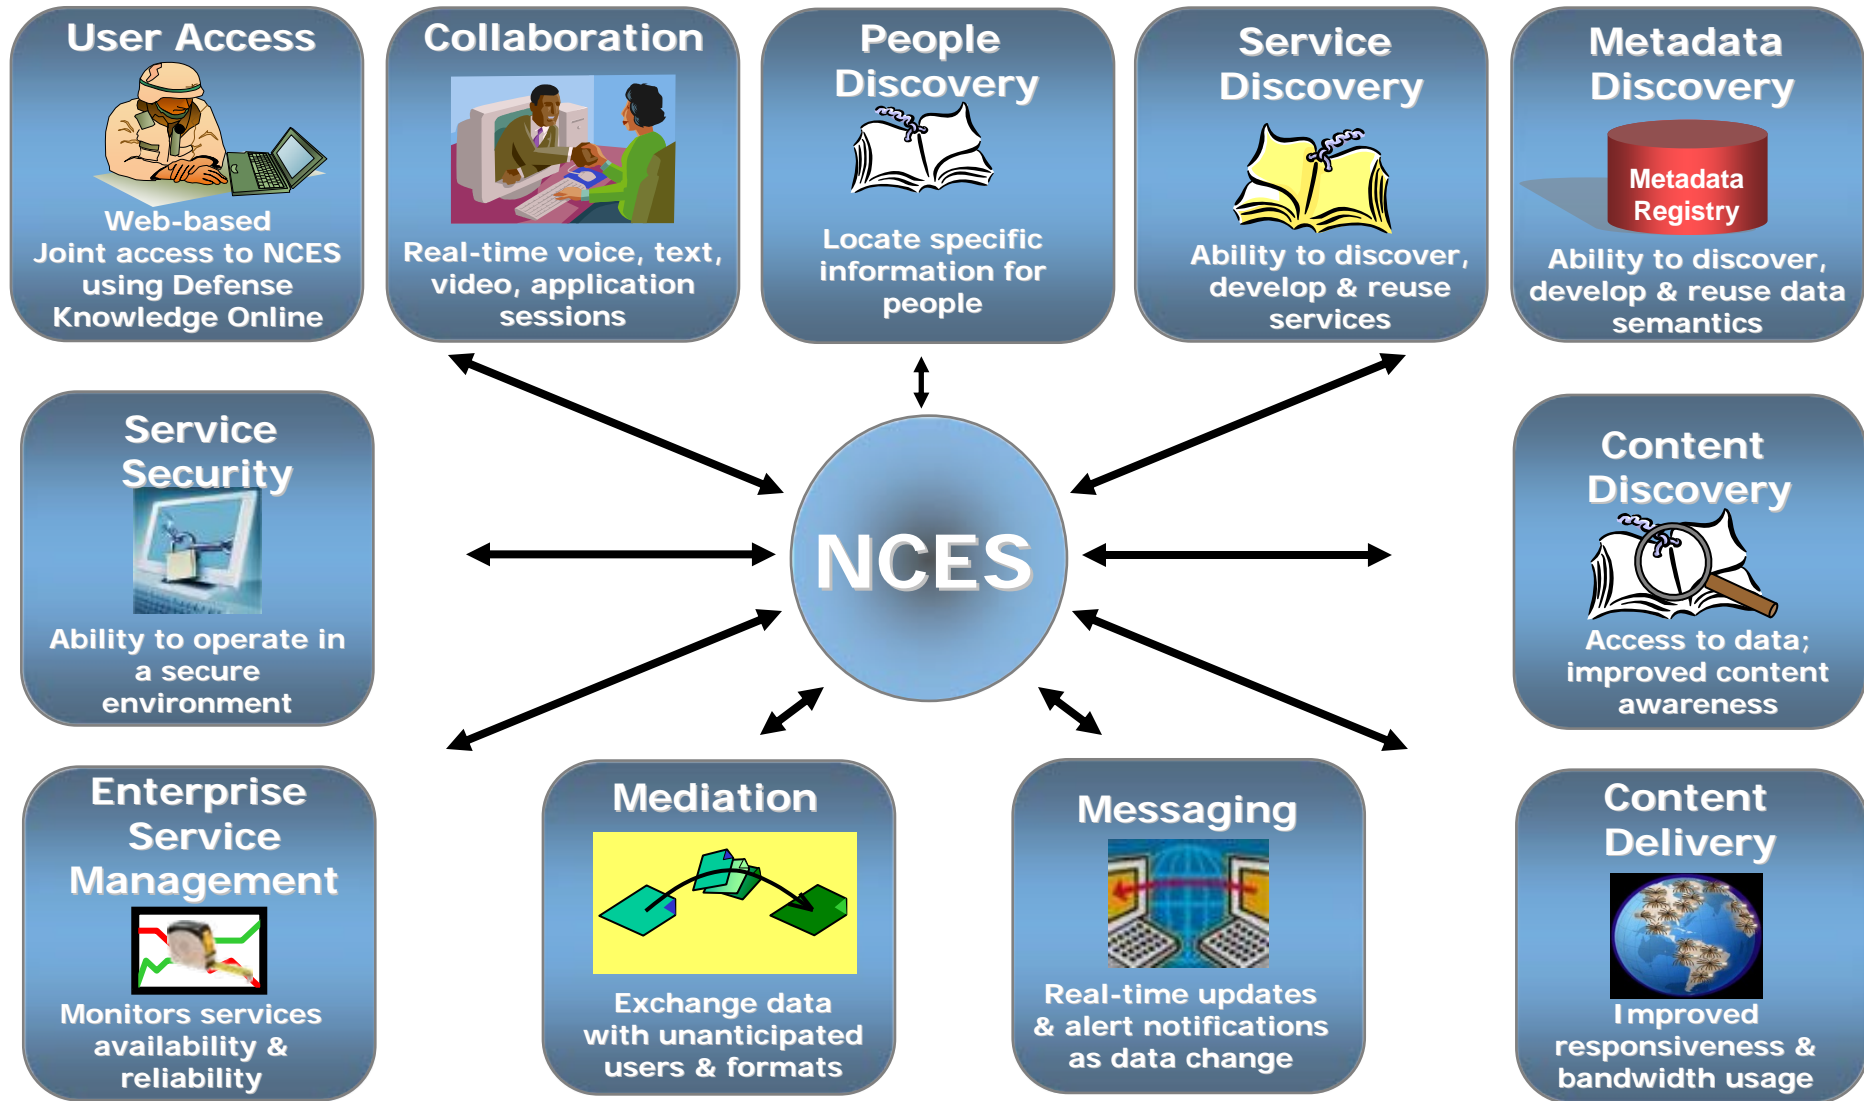

UNCLASSIFIED

Mission

The **NCES Program** will enable secure, agile, dependable **interoperable data sharing** environment for the DoD where the Warfighter, Business and Intelligence users share knowledge on a global network. NCES will facilitate **information superiority** and will **accelerate decision making, increasing effective operations** and **net-centric transformations**.

Net-Centric Enterprise Services Architecture

NCES Service Oriented Architecture Foundation

What's on the Horizon?

- **Collaboration Services:**
 - DISA Strategy is to provide the DoD the Power of Choice Acquisition Approach:
 - Button 1 E-Collab Center contract expires FEB 2010.
 - Button 2 Defense Connect Online contract expires OCT 2010.
- **Current Status:**
 - Consolidating/refining requirements from user communities. (Ongoing effort)
 - Planning activities for follow-on Contracts
- **Upcoming Events**
 - Release RFI (4th quarter FY08)
 - Conduct an Industry Day (4th quarter FY08)
 - Plan to release RFP (1st quarter FY09)

Way Ahead

- **Net-Centric Enterprise Services is looking for industry partners' support to implement DoD/IC enterprise services:**
 - **Assist Programs of Record in the incorporation of enterprise services**
 - **Utilize DoD/IC specifications, reference implementations, and compliance toolkits**
 - **Share best practices and lessons learned**
- **NCES managed service providers provide industry opportunities for continuous service capability improvements to satisfy objective requirements**
- **Next challenge will be to federate enterprise services across strategic, operational, and tactical operational environments**
