

standard for multi-purpose lighters. These regulations require manufacturers and importers to submit a description of each model of lighter, results of prototype qualification tests for compliance with the standard, and other information before the introduction of each model of lighter into commerce. These regulations also require manufacturers, importers, and private labelers of multi-purpose lighters to establish and maintain records to demonstrate successful completion of all required tests to support the certificates of compliance that they issue. 16 CFR part 1212, subpart B.

The Commission uses the information compiled and maintained by manufacturers, importers, and private labelers of multi-purpose lighters to protect consumers from risks of accidental deaths and burn injuries associated with those lighters. More specifically, the Commission uses this information to determine whether lighters comply with the standard by resisting operation by young children. The Commission also uses this information to obtain corrective actions if multipurpose lighters fail to comply with the standard in a manner that creates a substantial risk of injury to the public.

The Office of Management and Budget (OMB) approved the collection of information in the certification regulations for multi-purpose lighters under control number 3041-0130. OMB's approval will expire on July 31, 2004. The Commission proposes to request an extension of approval without change for these collection of information requirements.

B. Estimated Burden

The cost of the rule's testing, reporting, recordkeeping, and other certification-related provisions is comprised of time spent by testing organizations on behalf of manufacturers and importers, and time spent by firms to prepare, maintain and submit records to CPSC. There are an estimated 100 firms involved. Currently the Commission believes that there may be as many as 200 different models of multi-purpose lighters on the market. With a few exceptions, most manufacturers and importers have more than one model. Each manufacturer would spend approximately 50 hours per model. Therefore, the total annual amount of time that will be required for complying with the testing,

recordkeeping, and reporting requirements of the rule is approximately 10,000 hours. (100 firms \times two models \times 50 hours = 10,000 hours.) The annualized cost to industry for the 10,000 hour burden for collection of information is \$244,800 based on an estimated hourly wage of \$24.48/hr for the testing and recordkeeping required by the regulation.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Dated: March 25, 2004.

Secretary, Consumer Product Safety Commission.
