

# Medical Quality Control Development

William S. Barry, MD, MPH

## ● **Past Status Evaluations**

- Audits of Center activities
- Professional experience and availability
- Life saving capabilities
  - Equipment
  - Training
- Health promotion
- Health threat awareness
- Other activities

## ● **Past Efforts**

- Non-specific guidelines to NPR Handbook
  - Development of Center/Facility policies and procedures
- Training in Advanced Cardiac Life Support Capability
- Daily equipment maintenance / medication checks
- Documentation and information to patients
- Interaction with environmental health, safety, first responders/emergency preparedness
- Infection control efforts
- Focus on quality improvement
- Catastrophic Incidence Response Preparation

- **Current Efforts**

- Credentialing Documentation
- Certification Training
  - CPR
  - ACLS
  - MRO
- Life Saving Capability
  - Defibrillators/Automatic External Defibrillators (AED)
  - Medications/oxygen
  - Team interactions

## ● **Current Efforts**

- NASA Requirements
- Statement of Work
- Documentation
- Electronic Health Record System (EHRS)
- Quality improvement planning
- Continued health maintenance/improvement
- Confidentiality

## ● **Future Efforts**

- Credentialing
  - Civil Servant Physicians
- Privileging
- NASA Medical Quality Control Requirements
- Center/Facility specific medical quality control plan
- Incorporation as Electronic Health Record System (EHR) input consistency
- New test equipment for EHR automated input
- Continuing improvement efforts
- Continuing Health Improvement
