Questionnaire for Session

1.	What new science or application can result from advances of this neutron imaging technique or application area?
2.	What developments in techniques, such as technology for instruments or software are needed to enable these new areas of science?
3.	What are the characteristics of an instrument at the Spallation Neutron Source that would realize this new direction?
4.	What are the characteristics of an instrument at the High Flux Isotope Reactor that would realize this new direction?
