APPENDIX 31. A BIBLIOGRAPHY OF GOVERNMENT INFORMATION DISSEMINATION RESOURCES

Compiled by Sarah T. Kadec and Barbara Whiteleather, NCLIS Consultants[155]

Compilation of this bibliography was undertaken by NCLIS in support of its efforts to examine ways to improve government information dissemination to the public. For the most part, the items listed cover the years 1995 to date, except for older items considered classics or deemed as heavily impacting government policies and programs. Interagency efforts to address the same issues, such as the Solomon Island conferences on public access from 1990-1994, are included. It also includes a variety of items provided to NCLIS during the course of this study by organizations surveyed, members of Commission Panels, Commission experts, or interested individuals.

The bibliography makes no effort to duplicate statutes referred to either in the 1996 Congressional Research Service "Compilation"[156] or the NCLIS update of that document included in Appendix 35.[157] Furthermore, it was developed independently of the Bibliography of National Information Policies,[158] compiled by Toni Carbo, Dean of the School of Information Sciences, University of Pittsburgh, and her associates, so there may be some overlap between the two bibliographies.

NCLIS recognizes that this listing is far from complete and may have missed many important documents that would have provided the panels and the staff more valuable information for analysis. However, we believe that those listed here add considerably to the body of knowledge on this all important topic.
