Purpose

The purpose of this specification package is to provide the requirements and conditions for electronically filing FinCEN Form 103, the Currency Transaction Report by Casinos (CTR-C) information. For the purpose of these specifications, electronic filing of this report will be through the BSA E-Filing System operated by the Financial Crimes Enforcement Network (FinCEN). For more information on the BSA E-Filing System and to register please go to <http://bsaefiling.fincen.treas.gov>. This document should be used in conjunction with the 'General Specifications for Electronic Filing of Bank Secrecy Act (BSA) Reports' (General Specifications) available at http://www.fincen.gov/forms/files/General_BSA_Reports_E-Filing_Specs.pdf. It is recommended that you refer to the General Specifications first, and then the specific information contained in this document.

Electronic Filing

The BSA E-Filing System Batch File Testing Procedures are detailed in a separate document that can be accessed on the BSA E-Filing System web site at <http://bsaefiling.fincen.treas.gov> under Quick Links.

For purposes of these specifications, the Casino is the agency preparing the CTR-Cs and the Transmitter is the organization preparing the electronic file. The Casino and Transmitter may be the same or different organizations.

Generally, card clubs are subject to the same rules as Casinos, unless a different requirement for card clubs is explicitly stated in 31 CFR Part 103. Therefore, the term 'Casino' when used in this document includes a reference both to a Casino and to a card club.

Do not file a paper Form 103 for Casino transactions reported by electronic means.

Aggregation of Casino information is to be automated if possible, however, the requirement for aggregation is no different using electronic filing than it would be if filing paper CTR-Cs.

BSA regulations require that filers retain a copy of the CTR-C data or have the ability to reconstruct the data filed electronically for a period of five years. In addition, the electronic filer must retain the acknowledgment file from the BSA E-Filing System to facilitate inquiries for the same period as well as any 'working' papers that may be necessary for centralized processing of transactions.

CTR-Cs with errors are to be corrected and re-submitted as part of the next reporting period file when the information is readily available. When not readily available (e.g., Item 30 was checked and the customer does not have: (a) a casino check cashing, credit or deposit account or (b) a previously filed FinCEN Form 103 or federal tax form containing the customer's missing identification information), then correct and resubmit the CTR-C whenever the correct data can be obtained from: (a) a reporting agency that provides telephonic or on-line searching of customer identification information for those that applied for casino credit, and whether a customer has any outstanding casino debts, (b) public on-line database search engines that do not require a subscription, (c) organizations that provide subscription services to businesses and governmental agencies containing individuals' personal identification information (e.g., name, date of birth, permanent address) from their commercial databases, or (d) the customer returning to the casino and conducting transactions from which the casino has obtained knowledge.

File Organization

All incoming data must be in the expected format. **All records must be a fixed length of 520 characters.**

Based on the filer's application, ECC-D keeps identifying information on file for the reporting Casino. This data includes the Transmitter Control Code (TCC), transmitter and casino names, addresses, EINs, and Location Control Codes (LCC). The Transmitter and Header records use this information to correctly identify the

transmitter and the filer. Any records that do not match ECC-D files cannot be processed.

Records that fail to meet these requirements will be rejected and returned to the filer for corrections.

Transmitter (1A) Record

This must be the first record on the file. There can be only one of these records.

Casino Location Header (2A) Record

There must be one of these records for each Casino location included on the file. This record must immediately precede all records relating to that Casino location.

Transaction Summary (2B) Record

There must be one Transaction Summary Record for each transaction reported. This record will be the first for each transaction.

Customer (Part I - Section A) (2C) Record

There must be at least one customer record for each transaction. There may be up to 99 of this record type depending on the number of persons or organizations who are customers of this transaction.

Agent (Part I - Section B) (2D) Record

This record must be filed if a person(s) acted as an agent for the customers of this transaction. This record is not required if the customer conducted the transaction on his own behalf. There may be up to 99 of this record.

Location Summary (8A) Record

There must be one of this record type for each Casino Location reporting on the file. It is the control record for the reporting casino location. It must be the last record associated with the casino location.

Casino Summary (8B) Record

There must be one of this record type for each Casino reporting. It must be the last record associated with the Casino and will follow the last Location Summary Record for the Casino.

File Summary (9Z)

There must be one of these records on the file and it must be the last record on the file.

Transaction Summary (2B) Record - Required

This record identifies and describes the actual casino currency transactions and provides a summary of the transaction component parts and the transaction amounts. Data fields within the Transaction Summary Record identify the counts for the Customer (2C) Records and the Agent (2D) Record. There can be a maximum of 99,999 of these record types per file, one record for each transaction. The 2B Record item numbers refer to the CTR-C Form Part II.

NOTE REGARDING CASH-IN/CASH/OUT TRANSACTIONS (Items 31 and 32):

There must be at least one cash-in or cash-out transaction recorded in the Transaction Summary (2B) Record. Filers may record up to nine cash-in transactions and up to 10 cash-out transactions in the following fields. Cash-in transactions will be recorded in field positions 31 through 147. Cash-in transaction codes and amounts will be recorded in order beginning with the 'First Transaction: Transaction Cash-in Code' at field position 31. Cash-out transactions will be recorded in field positions 185 through 314. Cash-out transaction codes and amounts will be recorded in order beginning with the 'First Transaction: Transaction Cash-out Code' at field position 185. In all transaction entries the dollar amounts will be right-justified and zero filled. All unused fields will be space filled. Note: Cash-out codes for electronic submissions differ from those listed on the printed form. Electronic submission must use the codes specified in the Description and Remarks column.

Attachment A – Definitions

Below are the definitions for terms specific to this document. General definitions are contained in the General Specifications document.

Term	Description
Agent	Relates to the entries in Part I, Section B of the CTR-C. Any individual who conducts a currency transaction on behalf of another individual or organization.
Card Club	Any organization duly licensed or authorized to do business as a card club, gaming club, card room, gaming room, or similar gaming establishment in the United States, including tribal card clubs, and having gross annual gaming revenue in excess of \$1,000,000.00. The term includes the principal headquarters and every domestic branch or place of business of the establishment.
Casino	Any organization duly licensed or authorized to do business as a casino or gambling casino, including a tribal casino, in the United States and having gross annual gaming revenues in excess of \$1,000,000.00. This includes the principal headquarters and every domestic branch or place of business of the casino.
Checks	For purposes of this filing it includes all negotiable instruments (including personal, business, bank, cashier's and third-party checks), money orders, traveler's checks, certificates of deposit, and promissory notes not customarily accepted as money.
CTR-C	Currency Transaction Report by Casinos (Form 103).
Customer	Any person involved in a currency transaction whether or not that person participates in the casino's gaming activities.
Filer	Casino that prepares the CTR-C.
Gaming Day	A casino's normal business day by which it keeps its books and records for business, accounting and tax purposes. If the casino offers 24-hour gaming, its gaming day is the 24-period by which it keeps its books and records.
Location Control Code (LCC)	Code assigned to each casino location. The code is used to differentiate between various casinos that file under the same EIN. It is an alpha/numeric code, which must be used when submitting transactions electronically.

Attachment C - FAQs

Q1.	What code do we use for a location control code in records?
A1.	ECC-D will assign a location control code to every casino location filing electronically. Although most casinos have only one location per EIN (TIN), some casinos have multiple locations.
Q2.	If an error is identified in the Location '2A' records, will ECC-D still validate subsequent Location records?
A2.	Yes, if there are other location records we will continue validation. However, each location within the erroneous group will contain the location error. This entire group must be corrected and resubmitted.
Q3.	If we must begin each file with a Transaction Sequence Number starting with 00001 for each '2B' record, how are we to match the acknowledgment records with the right submission and sequence?
A3.	In the Transmitter Record '1A', the coverage beginning or ending dates should be considered with the sequence numbers so that each submission is unique. This record will be returned to you on the acknowledgment file for this purpose. You can also use the User Field position at the end of the record to enter an Internal Record Number (IRN) to match up acknowledgement records.
Q4.	The Amount of Transaction on the '2B' Record is in whole dollars. If I have a transaction for \$10,000.01, which is reportable, how should this be submitted?
A4.	Form instructions require that all fractional amounts be rounded up to the next whole dollar. This transaction for \$10,000.01 must be reported as \$10,001.

Attachment D - Invalid Transaction Total Amounts

The Transaction Total Amounts of currency is invalid in the Transaction Summary (2B) Record due to one of the following reasons:

- The amount is blank.
- The amount is not numeric.
- The amount is invalid. All of the following rules are checked:
 - The Total Amount (either Cash In or Cash Out) must be $\geq \$10,000$. If multiple transactions are involved, it is the aggregate total amount that must be more than $\$10,000$.
 - Cash In and Cash Out are separate and are not aggregated in any fashion.
 - If Cash In is $\geq \$10,000$ and Cash Out is $= 0$ or $\geq \$10,000$, then there is no acknowledgment error
 - If Cash In is $\geq \$10,000$ and cash Out is $= 0$, then there is no acknowledgment error
 - If Cash In is $\geq \$10,000$ and Cash Out is $< \$10,000$ and > 0 , then there is an acknowledgment error
 - If cash in and Cash out amounts are both $=$ to blank, then there is an acknowledgment error
 - If Cash In and Cash Out amounts are both $=$ to 0 , then there is an acknowledgment error
 - If Cash In is $< 10,000$ and Cash out is blank, then there is an acknowledgment error

- If Cash In is <10,000 and Cash Out is 0, then there is acknowledgment error
- If Cash Out is >=\$10,000 and Cash In is = 0 or >= \$10,000, then there is no acknowledgment error
- If Cash Out is >= \$10,000 and Cash In is = 0, then there is no acknowledgment error
- If Cash Out is >=\$10,000 and Cash In is <\$10,000 and >0, then there is an acknowledgment error
- If Cash Out is <10,000 and Cash In is blank, then there is an acknowledgment error
- If Cash Out is <10,000 and Cash In is 0, then there is an acknowledgment error
