Jack P. Broadbent
EXECUTIVE OFFICER/APCO

On January 30, 2006, the District proposed a minor permit revision for this facility. The main purposes of this revision were to revise permit conditions for VOC laden soil operations, to modify the landfill gas collections system, to correct the minimum operating temperature for the new A-51 Flare, to modify throughput limits for S-41, and to clarify the applicability for A-18 Water Sprays. The District also proposed administrative revisions to correct contact information and to remove equipment that had been permanently shutdown. This proposed revision did not result in any emission increases.

The EPA comment period ended on March 17, 2006. No comments were received from EPA.

The District has decided to issue the revised permit incorporating the proposed minor revision. Enclosed is a copy of the final revised permit. If you have any questions regarding this permit, please call Dennis Jang, Senior Air Quality Engineer, at: (415) 749-4707.

Sincerely yours,

Jack P. Broadbent
Executive Officer / APCO
