

October 24, 2007

Ms. Deborah Jordan
Director, Air Management Division
United States Environmental Protection Agency
75 Hawthorne Street
San Francisco, CA 94105

Dear Ms. Jordan:

This to advise you that the Bay Area Air Quality Management District is issuing a minor revision to the Major Facility Review Permit for Redwood Landfill, Inc. (Facility Number A1179) pursuant to Application # 11370.

On August 28, 2007, the District proposed a minor permit revision for this facility. The main purpose of this revision was to incorporate permit condition revisions related to a minor new source review permit (Application # 11371) that was approved by the District in January 2007. This project increased the maximum permitted landfill gas throughput rate for the A-51 Landfill Gas Flare up to the maximum capacity of this device and reduced the landfill gas throughput limit for the older A-50 Landfill Gas Flare. These changes resulted in a net heat input increase of 358,760 MM BTU per year for the two flares combined. The District also reduced the CO emission limit for the A-51 Flare from 0.3 pounds/MM BTU to 0.2 pounds/MM BTU as an updated RACT requirement. In addition to incorporating these Application # 11371 permit condition revisions, the District also updated the landfill gas collection system description for S-5.

The EPA comment period ended on October 14, 2007. No comments were received from EPA.

Subsequent to proposing this minor permit revision, the District identified an error on the title page of the proposed permit. The District also received a decommissioning notice from Redwood Landfill on October 11, 2007 indicating that two additional vertical wells had been shut down. As a result of this new information, the District is making the following non-substantial corrections to the permit:

- Correct the spelling of the name for the new facility contact for this site.
- Correct the gas collection system description in Table II-A.
- Correct the current gas collection system description, the effective date, and the list of authorized collection system alterations in Condition #19867, Part 17.

**EXECUTIVE
OFFICER/APCO**

The District has decided to issue the revised permit incorporating the proposed minor revisions and the corrections above. The final revised permit can be viewed on the BAAQMD website at http://www.baaqmd.gov/pmt/title_v/public_notices.htm. We will also send a copy of the final permit to you via the Electronic Permit Submittal System. If you have any questions regarding this permit, please call Dennis Jang, Senior Air Quality Engineer, at: (415) 749-4707.

Sincerely yours,

Jack P. Broadbent
Executive Officer/Air Pollution Control Officer
